

The Kingston Daily Freeman

FOUNDED IN 1871.

CITY OF KINGSTON, N. Y., MONDAY EVENING, SEPTEMBER 24, 1923.

PRICE THREE CENTS.

PRIMARY VOTE IS TABULATED

Shows There Were 859 Void or Blank Ballots Among 8,002 Cast—4,924 Republicans Voted to 1,078 Democrats.

Tabulation by the election commissioners of the vote cast in last Tuesday's primary election in Ulster county shows that nearly four and one-half per cent of the votes cast were void or blank.

The total Republican vote of the county and city was 4,924, of which 223 votes were either void or blank.

The total Democratic vote was 1,078, of which 138 votes were either void or blank.

Of the total vote of 8,002 cast by both parties, there were 359 votes which were not counted because they were either void or blank.

The Republican Vote.

The vote for the candidates who were voted for in the Republican primary election was as follows:

For Assemblyman.

Simon B. Van Wagenen 4,222
J. Wells Weaver 2,475
Ed. Schriver, Holt Winfield, Milard Davis, Daniel Healey, each one vote.

For Sheriff.

Herman Wells 5,796
Ralph Freer, Eliza K. Young, Jacob V. Merrihew, each one vote.

For County Superintendent of Poor.

Leslie L. Sagendorf 3,572
William S. Hartshorn and Robert Terwilliger, each two votes; Jerry Avery, one vote.

For Coroner.

Howard B. Humiston 5,699
Clifton B. Carpenter, two votes; Norman Connor, John F. Carnright, William Doyle, James Murphy, Grace Van B. Roberts, each one vote.

For Mayor.

Total vote cast 2,705
Albert H. Cook 2,720
Morris Block 22
Frank B. Matthews 15
P. N. Chase 1

For Alderman-at-Large.

Edward J. Dempsey 2,110
Michael Cashman and William B. Martin, each one vote.

Contest Made Big Vote.

From the foregoing figures, it appears that many voters in the city of Kingston voted in the contest for the nomination for assemblyman, but not for the nomination for mayor or alderman-at-large, for which there was no contest. For the nomination of superintendent of the poor, only the towns vote and not the voters of the city of Kingston, and the total vote for that office was 4,218, showing that 847 voters cast either blank or void ballots for that office.

The Democratic Vote.

The vote for the candidates who were voted for in the Democratic primary election was as follows:

For Assemblyman.

Holt N. Winfield 895
J. Wells Weaver 17
Simon B. Van Wagenen 27
Richard Donnelly, Francis Hoffman, Levi Clare, each one vote.

For Sheriff.

Jacob V. Merrihew 951
For County Superintendent of Poor.

Total vote 1,078
Robert H. Terwilliger 627
Leslie L. Sagendorf 1

For Coroner.

Clifton B. Carpenter 941
Howard Humiston, three votes; Richard Schriver, Mrs. R. McCutcheon, each one vote.

For Mayor.

Total vote 496
Morris Block 339
William B. Martin 3
Albert Cook 2
William C. DeWitt 1
Dr. Harry Connolly 1

For Alderman-at-Large.

Michael A. Cashman 346
William B. Martin 1

Brinnier Won By One.

In the Tenth Ward, where Judson S. Niece had been selected as the regular Democratic nominee, Augustus Brinnier took the nomination by a majority of one vote. Brinnier received seven votes and Niece received six votes.

How Mack Was Nominated.

In the Eleventh Ward, Frank A. Myers was recommended for the Democratic nomination for superintendent. He intended to file a declaration after his nominating petition was filed but forgot to do so until it was too late. His name was on the ballot and could not be taken off. But Mr. Myers asked enrolled Democrats to vote for John B. Mack for the nomination, with the result that Mr. Mack received 20 votes. Mr. Myers, however, received six votes, and Fred Richter received one vote.

Contests for Committeemen.

There were contests for members of the Republican county committee in two districts.

In the second district of the town of Gardiner, Luella Fleming received 55 votes, Charles B. Wright received 38 votes and Ivan Ostrander received 35 votes.

In the first district of the town of Marlborough, Doyle Hutchings received 101 votes, George Halwick received 55 votes, William P. McConnell received 63 votes.

In the fifth district of the town of Ulster, there was also a contest although no contesting petition had been filed in that district. Peter Sawyer received 66 votes, W. Morris Johnston received 30 votes and Ralph Freer received 29 votes.

Two members of the county committee were elected from each election district.

TREASURY SHOWS GREAT SURPLUS

\$400,000,000 to the Good as Result of Increased Income and Economies—Hope For Bonus and Lower Taxes.

By Telegram to The Freeman.

Washington, Sept. 24.—The government's ledger will show a surplus of \$400,000,000 this fiscal year as result of a steadily increasing income and the administration's economy program, treasury officials estimated today. This figure is double that of previous surplus estimates and virtually assures a reduction of federal taxes by the next congress.

What form tax reduction will take is not yet known. The treasury department's experts are studying the question, but have not yet submitted their conclusions to Secretary of the Treasury Mellon. The secretary will defer for some time announcement of his recommendations to congress.

His annual report goes to congress in December, soon after it convenes. His recommendations, however, will be framed within the next thirty days, as some of the phases of tax reduction already have been the subject of discussion by the president and his cabinet.

Strong pressure will be exerted in both the house and senate for lowering the rates on moderate incomes. Advocates of this plan are gaining new support and indications are that unless this is done they will oppose efforts of the administration to reduce surtax rates on large incomes.

Soldiers' bonus supporters are heartened by the certain prospect of a big treasury surplus, as they figure it will increase the support both for a bonus and for tax reduction. Bonus supporters do not anticipate that the tax reduction program will militate against them.

Within another year, experts estimate that it should be possible to confine government spending to within a \$2,500,000,000 limit, as against the present estimated expense account of \$3,000,000,000.

While the individual income tax collected this year probably will not much exceed the total of last year, about \$700,000,000 corporation taxes probably will approximate \$600,000,000 or nearly double last year's figures. Back taxes collected by the internal revenue bureau in its clearing up of tax appeal contention may equal that of last year—\$300,000,000. Not less than \$1,000,000,000 is counted upon from miscellaneous internal revenue.

Joined Y. M. C. A. FIFTY YEARS AGO

Lived at Local Association Building Eight Years and What He Has Seen Makes Him Strong Supporter of Present Campaign.

Editor, The Freeman:

Talking of the drive now on for the Kingston Y. M. C. A. \$25,000, if the people really knew what the "Y" has done even in the eight years since I have been living there myself the amount would be easily raised on the time allowed.

I first joined the Y. M. C. A. in New York city over 50 years ago. At that time I could only join the association as a school boy, and have the use of the gymnasium in the afternoons, but "Old Man Wood" was in charge there, and he looked on all boys as good, and made the most of them, and it was a busy, happy crowd, alright. I have been here in Kingston eight years at the Y. M. C. A. as a senior social member, and I have been proud of what the "Y" has done for Kingston during that time. I am most proud of the Kingston Central Y. M. C. A.'s work for the women's Christian association of Kingston, N. Y., now actively under way in a fine new building.

To enumerate the real drives that the "Y" has undertaken for others would surely put this one across, but the people of Kingston don't need this kind of reminder, because their own children and other peoples' boys and girls will attend to that.

Hurrah for the Y. M. C. A. DOWNING VALLEY.

AMBASSADORS REPORT WILL ABSOLVE GREECE

By Telegram to The Freeman.

Paris, Sept. 24.—The inter-allied council of ambassadors will meet tomorrow to consider the majority report of the mixed inquiry commission which went to Jannina to investigate the killing of General Tellini and four other Italians on Greek soil. It is understood that the majority report absolves Greece of all blame and sets aside Italy's claim for indemnity. The Italians refused to sign the report and repeated their original charges of responsibility against the Greeks in a minority report.

SHUFELDT'S NEW LAW OFFICES ON WALL STREET

Augustus Shufeldt on Saturday removed his law offices from the Warren building, No. 260 Fair street, to the Advance building, opposite the court house, on Wall street, where he will occupy rooms 203 and 204. Mr. Shufeldt's new telephone is 2305-W.

Autumn Here.

Sunday, the calendar says, was the first day of Autumn.

GUNMEN BUSY, SAYS W. D. M'BEE

Are Intimidating Oklahoma Legislators But 78 Will Be At Impeachment Session of Lower House.

By Telegram to The Freeman.

Oklahoma City, Okla., Sept. 24.—Gunmen and secret service operatives in the employ of Governor J. C. (Iron Jack) Walton, are circulating throughout the state, intimidating legislators who were planning to assemble here Wednesday to impeach the governor. Representative W. D. McBee, leader of the legislative fight to impeach Walton, charged today.

"The intimidators," he said, "number at least 25. Some of them he declared are hardened paroled convicts."

McBee said that "regardless of this disgraceful procedure" he could promise that "within 48 hours, 78 members of the lower house will be in Oklahoma City to attempt a peaceful assembly."

"Reports of intimidation and coercion have come to him over long distance telephone from legislators who answered his call for the meeting of the house," McBee said. "Legislators he said, have been told they would lose business; that to come to Oklahoma City would be 'poor politics' and one of them, he said, was warned he 'would be walking into a death trap.'"

High legal talent has informed him, McBee said, "that the exclusive right to convene an impeachment is vested in the house."

Five attorneys who were asked by McBee to pass on the legal right of the house and senate to convene Wednesday, reported to him, McBee said, that no court, governor or outside authority, has any legal right to interfere with such an assembly.

The opinion was signed by R. J. Keaton, Oklahoma City; O. W. Patchell, Paul Valley; Alger Melton, Chickasha; John Shirk, Oklahoma City; Jay Knight, Wyandotte.

The committee of lawyers at one point in the brief, called attention to section 164 of the statute, which provides that "the senate when organized and sitting as a court of impeachment, shall have power to recess from time to time and hold sessions after the adjournment of the legislature."

Informing that Governor Walton, in a statement last night, had asserted he would welcome federal investigation of the situation in Oklahoma, including McBee's charge that Walton has created a despotic super-government and Walton's counter charge that the Ku Klux Klan is trying to run the state, McBee said:

"Federal intervention would suit us, too."

McBee declared the legislative body that sits to hear the impeachment testimony against the governor will meet in open forum that all charges will be made openly and that the public will be welcome. The military court with one information filed, resumed its sessions in a downtown hotel this morning. The single information which resulted in the arrest of N. C. Jewett, grand dragon of the Oklahoma Klan, will be followed by a number of other informations early this week, it was intimated.

The preliminary hearing of Jewett, scheduled for tomorrow is expected to be delayed.

Although Governor Walton asserted more troops would be brought into the city, none have arrived here in the last 24 hours.

The governor in his latest talk to newspaper men, denied that he had fought on the Ku Klux Klan was actuated by political motives and said he would not be a candidate for United States senator in the 1924 election. He said his order for the destruction of the ferry crosses throughout the state generally has been obeyed. He gave out testimony of J. H. Smithman, negro, before the military court at Tulsa, in which the witness told how he was seized, abducted, whipped and mutilated by masked men who cut off his ear and tried to make him eat it.

SMITH CHARGED WITH SEDUCTION

Linderman Avenue Man Arrested in Albany on Complaint of Kingston Girl—Hearing Wednesday—Hassan Kader Hearing on Tuesday.

Chief of Police J. Allan Wood went to Albany on Saturday afternoon and returned with David Smith, a young man residing on Linderman avenue. Smith was arrested on a charge of seduction preferred by Miss Grace Dougherty, of 421 Hasbrouck avenue.

This morning in police court before Judge Schirick the hearing was adjourned to Wednesday morning and bail fixed at \$700, which was furnished by the young man's father, David G. Smith. Smith was represented by Attorney Frank W. Brooks.

The hearing in the case of Hassan Kader, the young man charged with corrupting the morals of a fifteen-year-old girl who lives on North Front street, was adjourned Saturday afternoon until Tuesday morning. Kader is now in the county jail awaiting a hearing.

"Fool Time" Nearly Ended.

Daylight saving time ends in Kingston, by city ordinance, next Sunday morning at 2:30 o'clock. Timepieces should be set back one hour.

FIVE DEAD IN BALLOON RACE

Including Two Americans Whose Craft Was Hit by Lightning—All U. S. Competitors Out of Running.

By Telegram to The Freeman.

Brussels, Sept. 24.—The United States army balloon S-6, which started in the international race for the James Gordon-Bennett Cup, was struck by lightning near Nistelrode, Holland, killing the pilot, Lieutenant Olmstead and his assistant, Lieutenant Shoptaw, said a dispatch received at race headquarters today. The balloon fell in flames.

The Belgian Aero Club advised the American embassy of the death of Lieutenants Olmstead and Shoptaw and requested that the embassy arrange to claim the bodies for shipment home.

The balloons ran into a violent thunder and lightning storm which played havoc with them. Up to noon word had been received of the death of five men and the serious wounding of another.

All the Americans are out of the race. The United States Navy balloon A-6699, piloted by Lieutenant Lawrence, landed safely near Cutten, Holland, while the third American entry, piloted by Ralph Honeywell, failed to start.

The first intimation the Belgian Aero Club had of the tragedy was receipt of a telegram at 9:45 o'clock signed by a Dutch doctor. He said that the charred wreckage of a balloon had fallen near Nistelrode and that the occupants, both dead, had been identified as Lieutenants Olmstead and Shoptaw.

This was only one of a series of messages telling of disaster and death.

Two Swiss lieutenants had been killed when the Swiss balloon Geneva was struck by lightning near Beverlee and fell like a comet with a tail of flames and smoke trailing out behind. The victims were Lieutenants Von Gruening and Wheren, of the Swiss army.

One of the three Spanish balloons crashed near Heyst-Geer, killing the pilot, Lieutenant Penaranda and breaking the leg of his assistant, Lieutenant Gomez.

Seventeen balloons, including two Americans got away at the start. Before the getaway Lieutenant Olmstead told the International News Service in an interview he was positive the cup would be won by the United States.

Lieutenant Robert Olmstead lived in Boston and he was regarded as the "hope of the American army" in the contest.

The French balloon Fernande, piloted by Lieutenant Blanwet, was forced by the storm to land near Antwerp.

Destruction of the Spanish balloon Polar at Heyst took place amidst dramatic circumstances. The balloon was flying at an altitude of 1,200 meters when spectators below saw a flash of lightning. It was followed by a loud crash like thunder. The balloon began to fall, but the pilot threw out the sand ballast and remounted. Then it burst into flames.

The Polar crashed to earth a twisted burning mass. Witnesses rushed to the scene and overturned the charred basket. Gomez's body was found underneath. He had been killed instantly by lightning. His watch had stopped at 5:30 o'clock.

Penaranda was found lying fifteen feet from the basket with a broken leg. Gomez's body was shipped to Brussels, while Penaranda is confined in a hospital at Heyst.

The Swiss balloon Zurich, piloted by M. Picard, was forced by snow to land 20 miles south of Eindhoven.

At 3 o'clock this afternoon ten of the balloons were still unaccounted for.

ALBA THINKS SPANISH DIRECTORATE TEMPORARY

By Telegram to The Freeman.

Brussels, Sept. 21.—Former Foreign Minister Alba, of Spain, who fled when the military uprising overthrew the government, declared in an exclusive interview with International News Service today that he expects to return to his old post because he is convinced the present administration at Madrid is only temporary.

"While taking advantage of the hospitality of the Belgian government I do not wish to criticize the Spanish government," said Alba. "I say, however, that I do not think it will last long. It is a temporary phase."

"I am charged with negotiating with England for exchange of Spanish Morocco for Gibraltar, but that is a bad mistake. The fact is that is the plan of Primo Rivera group."

"Not many days ago, I dined with Alexander F. Moore, the American ambassador to Spain. During the course of our conversation, he said: 'You should come to America. You would soon be a great and successful business man.' Four days later, I found myself out of a job. But I am convinced that I shall return."

CITY HALL DOME BECOMES PIGEONS HOME

Four pigeons are making their home in the tower on the city hall and all efforts to dislodge them have proved fruitless. The owner may have the pigeons by calling at the city hall any day and interviewing Superintendent Luedtke, and capturing the birds, which are handsome ones. All of the windows in the tower have been opened but the pigeons evidently have decided to make the city hall their winter quarters.

ASSISTANT NAMED TO ST. JOSEPH'S

The Rev. M. J. A. Coutlee, From Highland Falls—The Rev. J. Talbot Named to N. Y. Pastorate.

Announcement has been made of the appointment by the Most Rev. Patrick J. Hayes, archbishop of the archdiocese of New York, of the Rev. M. J. A. Coutlee, an assistant pastor of St. Joseph's Church of this city.

The Rev. Father Coutlee has been chaplain at the convent of Jesus and Mary at Highland Falls. It is not stated when he will take up his new duties in Kingston.

The Rev. James Talbot of Warwick, Orange county, formerly assistant pastor of St. Mary's Church of this city, has been appointed by Archbishop Hayes to the pastorate of St. Patrick's Old Cathedral in Barclay street, New York city. Father Talbot has many friends in this city.

HURLEY REP'S PRESENT TICKET

At a town caucus of the town of Hurley called Saturday night by the Republican town committee, the following candidates were named as candidates for town offices on the Republican ticket:

Supervisor, Edgar Rowe, Town Clerk, Clarence Ostrander, Collector, T. Sherman Lennox, Town Superintendent of Highways, Thomas H. Newkirk, Assessor, four years, Fred Saxe, Assessor, two years, J. Wesley Mosher.

Justices of the Peace, Hervey White, John A. Miller, Overseer of the Poor, Edgar Barnes, John I. Ostrander, Constables, Eugene Ostrander, Walter Van De Mark, Andrew Fay, School Director, William Markle.

The following committee to fill vacancies was named: Frank Snyder, John H. Saxe, Frank Ten Eyck, Clayton W. Vredenburg.

T. Sherman Lennox presided at the meeting and Clayton Vredenburg acted as secretary.

TWO INJURED IN SUNDAY CRASH

Two Automobiles Collided at Broadway and Delaware Avenue That Morning—Injured Taken to Beneficent Hospital—Other Auto Accidents.

Grover Van Etten of No. 20 Prospect street, Poughkeepsie, and Ira Hadel of No. 178 Hasbrouck avenue, this city, were injured Sunday morning when the automobiles they were riding in collided at Broadway and Delaware avenue. At the time the congregations from the various churches were on the way home, and a large crowd soon collected at the scene. Dr. John F. Larkin was summoned and removed the injured men, who were badly cut about the head, to the Beneficent Hospital, and after their wounds were dressed, both men returned to their homes.

From the police report of the accident Chester G. Kilmer of No. 15 St. James street, was driving his Oldsmobile on Broadway and turned into Delaware avenue in front of the Columbia car of Aleck L. Mead of the State Hospital, Poughkeepsie. As a result the Columbia struck the Oldsmobile, and both cars were quite badly damaged. Van Etten was riding in the Poughkeepsie car and Hadel in the Kilmer car.

The Poughkeepsie car was towed to the Delaware Avenue Garage for repairs.

Saturday evening Dennis Nash of Cheshire, Mass., reported that his car was struck by an auto of Sam Weisberg of 271 Fair street at Broadway and St. James street. Both cars were somewhat damaged.

Saturday evening May Bush of R. F. D. No. 2 reported a collision with an auto of Harold Elliott of the New York board of Water Supply on the Washington avenue viaduct. Both cars were slightly damaged.

Saturday Harold Every was driving up Broadway in his Greenland runabout and reported being struck by Elmer McEvan of Grand George driving a new Overland sedan while cutting across Broadway to go into Elmendorf street. Both cars were damaged.

LEAGUE DEBATE ON ARTICLE 10 INTERRUPTED.

By Telegram to The Freeman.

Geneva, Sept. 24.—Discussions of article ten in the League of Nations assembly was interrupted today by speeches of condolence for the death of Lord Robert Cecil's secretary. The debate was to have centered around a commission report interpreting the article.

M. Rolin, of Belgium, chairman of this commission, said in his report to the league:

"Article ten was incorporated in the pact in its original form exactly as President Woodrow Wilson drafted it. It has been a source of discussion ever since. Even the first assembly discussed an amendment. Debate will continue tomorrow."

An Ellenville Enterprise.

William R. DuBois of Ellenville has filed a certificate with the county clerk stating that he intends to do a general hardware business in Ellenville under the firm name of Lemuel DuBois & Company.

COOLIDGE'S FIRST ADDRESS AS PRESIDENT IS TO THE RED CROSS

Opens Annual Convention—Can't Discard Armed Force Yet, He Says, But World is Relying More and More on "Moral Force."

By Telegram to The Freeman.

Washington, Sept. 21.—"The hope of real progress in the future lies in the knowledge that civilization is coming to rely more and more upon moral force rather than armies and navies for the settlement of world problems," President Coolidge declared today in an address before the annual convention of the American Red Cross in Continental Memorial Hall.

"The American Red Cross," the president said, "is a spiritual conception of human relationship. It is life in obedience to the things that are unseen."

"Throughout history men have been prone to put their trust in other things and have failed. They have sought for power through material resources alone. They have thought it might be gained by the accumulation of great riches. They have attempted to rely upon naked force of arms and navies, conquering by the might of the sword. They are necessary for security, as police and criminal courts, and belts and bars are necessary."

"They are adjuncts of peace. But they are negative forces. They do not create, they resist. They are not the ultimate force in their world. They do not make the final determination among men. Over them is a high power."

"Mankind has not yet, cannot yet, discard the use of these forces. It is significant, however, that the great nations have at last agreed upon their limitation. But it is even more significant that civilization is coming more and more to rely upon moral force."

This was Mr. Coolidge's first public address since he became president. As president also of the Red Cross, Mr. Coolidge formally opened the convention which was attended by more than 1,000 delegates from all over the country. Members of the cabinet, a number of foreign diplomats and many other government officials heard the president's address.

In the spiritual conception of world relationships, Mr. Coolidge pointed out, lies the hope of real progress. But the ideals of human brotherhood and service and peace are idle dreams, unless they can be translated into action.

"It is necessary, on the one hand, to avoid the illusions of the visionaries, and on the other hand, the indifference of the selfish," he said.

"Each individual and each nation owe their first duty to themselves. Beyond that, there is the obligation of the strong to serve the weak, but that will not destroy or degrade by making mendicants, but will restore and strengthen by making character. It is the policy which helps in an emergency, but realizes that, finally, each individual and each nation must work out their destiny."

After winning the national race at Indianapolis this team went to Europe for the Brussels race, accompanied by Lieut. Joseph Bailey, an operations officer and alternate pilot, and Edward R. Borland, an expert balloon rigger.

Two Others Severely Hurt on Troy-Schenectady Road—Caesarian Operation on Dying Woman is Futile.

By Telegram to The Freeman.

Schenectady, Sept. 24.—Schenectady county authorities today started an investigation of a trolley-car automobile collision on the Troy-Schenectady road yesterday afternoon in which four persons were killed and two injured.

The dead, all of Niskayuna, a small place near here: Mrs. Robert Talford, 20, Regina A. Talford, young daughter of Mrs. Talford, Earl Moore, 25, Mrs. James Lavee, 25, Herbert Clark, seven, son of Mr. and Mrs. George Clark, 80 Water-street avenue, Albany, suffered a fractured skull.

Robert Talford, 27, driver of the machine, suffered a fractured leg. Mrs. Talford lived a short time after reaching Ellis Hospital. In the hope of saving her unborn child, physicians performed a Caesarian operation, but the baby was dead.

BIBLE BEST BOOK OF ALL VAN BUREN'S FAVORITES.

At the regular meeting of the Christian Endeavor Society, held at the First Reformed Church on Sunday evening, Augustus H. Van Buren delivered an inspiring, if brief, talk on "Gems From Books I Have Read."

Isaiah 2 as women are now taking an active part in the making of American history, Mr. Van Buren advised them to make a serious study of the history of their country and recommended the reading of Bancroft. As for the American Revolution, the speaker considered that Traylor's History of the American Revolution was by far the best he had ever read, though the writer was an Englishman. For himself, Mr. Van Buren liked best the older poets, Tennyson being his favorite. To his mind nothing in the world of drama could equal that of the old Greek dramatists unless it be Shakespeare.

In the realm of fiction, the speaker said he liked greatly to read French fiction in the French language which has so much more of delicacy and grace and appeal to the imagination of the reader than has the English language.

But the book of all books was the Bible, according to Mr. Van Buren, who devoted a good part of the time of his address to the Bible and its gems of thought.

TWO VIEWS OF LEAGUE BY RETURNED AMERICANS

By Telegram to The Freeman.

New York Sept. 24.—Americans returning from the Adriatic, declared the league should be given credit for the settlement of the Greco-Italian affair without resort to war.

"The demonstration at Geneva of the power of public opinion," said Baker, "is a final answer to the critics of the league. It was proper that the council of ambassadors acted as the immediate agent, but had there been no council, the league would have found some other body."

It is understood that Mr. Baker will shortly go to Washington to "report" to Woodrow Wilson, his former chief, on his observations at Geneva.

Quite the opposite view to Baker's was expressed by Justice Daniel F. Cohan of New York, also an Adriatic passenger.

"Muscolini has ratified the judgment of the United States in staying out, by absolutely exposing the league's impotency," said Cohan. "The league has been ineffectual in Franco-German and Greco-Italian cases."

THE OFFICE CAT

By Puck

Many a Good Man
Has Been Shot at Sunrise—
Pierced
With a Multitude of
Highballs.

This is a backward year, and nothing has appeared on time except the fall dresses and millinery.

This has been such a pleasant summer the society of Is-it-hot-enough-for-you idiots has had to disband.

The newspapers are making a great fuss over the fact that President Coolidge likes custard pies. Any man who wouldn't like custard pie isn't fit to be president, or even constable.

It was a hot day on the border. The regiment had been ordered to move, and for more than an hour a soldier has tried to get his mule into a box car. The chaplain came along and began to laugh at the soldier's discomfiture. The poor soldier turned as he wiped his perspiring brow and said:

"Chaplain, how did Noah ever get two of these things into his Ark?"

It may come to pass that a prescription will be necessary to get a few lumps of coal.

The Coal Dealers' Hymn.

Yes, WE have no-O STOVE COAL.
We have no-O Stove Coal today.
We've Egg Coal, Soft Co-al, Pea Coal
And Nut Coal
And all kinds of coal, and say—
We have some old-fashioned Buck-wheat,
Pora-hon-tas and New River;
But YES—we have no-O Stove Coal.
We have no-O Stove Coal, today.

Clothes cover a multitude of chigger bites.

Alice Bear of Topeka was fined \$100 recently for going about her house that way.

Where one spends the summer generally depends on what one has to spend.

"Now is the season when the amateur gardener is afraid there will be a frost on account of his tomatoes and afraid there won't be on account of his hay fever."

Appropriate.

Jack—"There's a new baby up at our house."

Pat—"Named him yet?"
Jack—"Yes, we're going to call him Bill. He came on the first of the month."

AGRAPHES.

Oh knew he but his happiness, of men
The happiest he! who far from public rage,
Deep in the vale, with a choice few retir'd
Drinks the pure pleasures of the rural life.

—Thomson.

Crop rotation and diversification are sound forms of insurance for the farmer.

Uncle Ab says: I never learned how to do anything but what it came in handy sooner or later.

Keep an account book and enter therein every farthing of your receipts and expenditures.—George Washington.

Bacteria are increased in milk if cows are either brushed or fed around milking time. F-60, a free bulletin from the college of agriculture at Ithaca, tells about it.

Cooperation brings to the farmer the benefits that organizations have brought to labor. Group marketing gets a fair return for the products the farmer sells, just as group action has given better returns for the labor which the workingman sells.

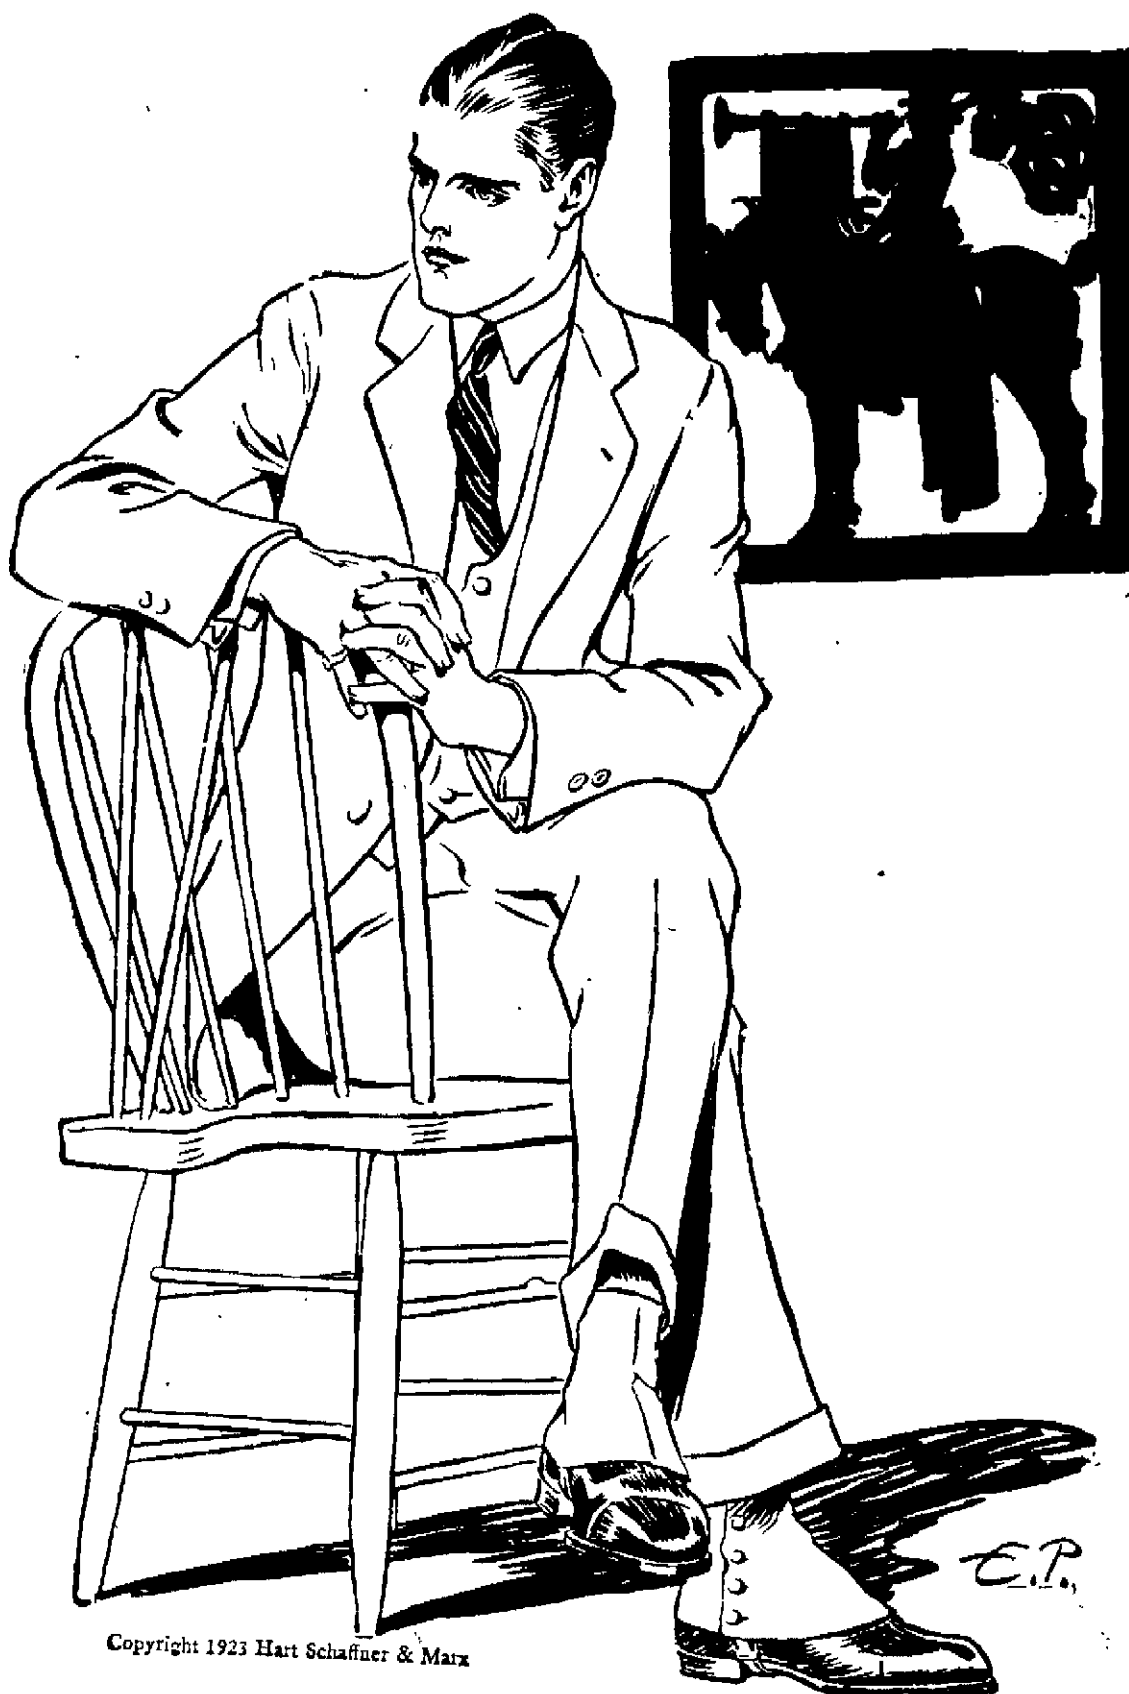

Farm boys of New York don't have to spend four years at college to get some of the benefits of its teachings. There are the correspondence courses, and the winter short course. Write to the state college of agriculture at Ithaca and learn about this free instruction.

M. E. GROUP MEETING AT ASOKAN TUESDAY.

The Ashokan M. E. group meeting will be held at Ashokan Tuesday afternoon at 3 o'clock. Addresses will be delivered by Dr. C. G. Kelley of Tunis, North Africa, and the Rev. S. S. Robbins of Olive Bridge and the Rev. E. M. Conover of Philadelphia. Dr. Griston will preside. The following M. E. Churches will participate: Pine Hill, Big Indian, Shandake, Oliveville, Phenicia, Lanesville, Olive Bridge, Samsonville, The V.F. Woodstock, Wittenberg, Willow, Shady, Ashokan, Glenford and West Hurley. Supper will be served at 6. Evening session, 7-8. Illustrated lectures will be given at the evening session. All sessions open to the public.

Making Opportunities.
A wise man makes more opportunities than he finds.—Bacon.

RENNER BLAMED FOR ACCIDENT

John Renner, son of Wally Renner of Haines Falls, was arrested Thursday last by Sheriff Pierce on a warrant sworn out by William Haas of Coxsackie, who charged, Renner with operating a car while intoxicated and with the responsibility for the accident which took place Friday evening, September 14, on the Athens-Coxsackie state road. Renner was taken before Judge E. C. Hallenbeck at Coxsackie. He asked for an examination and the case was adjourned until Thursday, the court releasing him on \$1,000 bail. Attorney J. Edward Lackey of Tannersville represented the accused and Attorney Leonard A. Warren of Coxsackie appeared for Haas. As a result of the accident Mrs. Renner, who was riding with her son was taken to the Kingston City Hospital with fractured ribs and bruises about the head. A brother of Mr. Renner who was also in the car received two broken ribs. Mr. Haas, whose car was in the collision is still suffering from fractures of five ribs.

HOME BUREAU RESUMES WORK

After a vacation of July, August and September, Home Bureau communities are ready to start their project work again. One of the first lecturers coming to the county is Dr. Florence A. Sherman, a well known specialist on the care of the feet and general posture. Dr. Sherman comes from the Department of Education at Albany and is well able to give advice to those troubled with disturbances of the feet. Dr. Sherman will be in the county the week of October 22nd.

Nutrition training schools will begin on October 15th. The nutrition study for this year will be an advanced continuation of last year's work and will include the study of digestion and advanced meal planning.

Another popular project which will be carried on during the week of October 22nd will be sewing machine schools in various communities of Ulster county. The sewing machine schools held last year proved so helpful that many requests have come in from communities to repeat them. More detailed information will be found in later issues.

The clothing work is beginning this week. Miss Fisher is attending an all-week clothing school in Ithaca this week and a schedule for the county will be made up as soon as she returns.

After having graduated from the Syracuse (N. Y.) High School as valedictorian of his class, Moses Finkelshteyn, 11 years old, has matriculated as a full-fledged freshman at Syracuse University, by many years the youngest student who ever entered the college.

How Robbie Lost.
 Little Robbie attended a modern school where the mental defectives are graded out by intelligence tests, designated "subnormals," and given special instruction in an ungraded department. The other day he asked his father for money. "What because of all those pennies I gave you day before yesterday?" asked his father. Little Robbie is a truthful boy and has never been made to fear the results of candor, so after hitching about from one foot to the other awhile he replied: "I lost 'em playing a funny game with one of those subnormal kids."

Her Chance.
 Your modern youth is not at all backward. This was overheard between dances. They were seated behind a large palm. "How about a little kiss, girlie?" "Seems to me," responded the damsel, "that you are pretty fresh for a young man who has just been introduced to me." He rolled a cigarette. There was a long pause. Then the young lady vouchsafed some further information. "I never kissed a man in my life." The youth spoke up promptly. "Well, here's your chance, girlie, here's your chance."

A \$650 Pine-Knot.
 Perhaps the most valuable piece of wood ever discovered was recently sold for \$650 by a Louisiana lumberjack to a traveling showman. This wonderful freak of nature was discovered in an old pine tree. It is nothing more than an ordinary knot of the variety often met while chopping off your firewood. Yet this extraordinary object of art is an exception, for it represents a perfect meteor-like appearance, often mistaken for a piece of congealed molasses or the photograph of the moon's face.

TAMMANY AIMS AT STATE CONTROL

Republican Women's Organization Starts Campaign To Increase That Party's Lead In Assembly.

By Telegraph to The Freeman.
 New York, N. Y., September 24.—An active campaign to increase the Republican lead in the state assembly was started yesterday when Miss Sarah Schuyler Butler, chairman of the Republican Women's State Executive Committee, announced a series of meetings which will take place throughout the state.

Miss Butler in her first statement to the public since her appointment as leader of the Republican women of the state, said yesterday:

"The election of Republican assemblymen this fall is one of the most important questions which the people of the state have ever been called upon to decide. This is by no means an off year in politics. On the contrary, it should attract the interest of every man and woman, because it was only the Republican majority in the Assembly last year which stood between the people of the state and complete Tammany control."

"We do not believe that the people of the state desire to see the methods now in vogue at the New York City Hall extended to the rest of the state. The Republican majority in the Assembly protected the people last year. We have full confidence that they will be given an opportunity to perform similar service this year."

"Needless to say, Tammany is making every effort to complete its grasp on state government. Men and women in the state have only to consider what the Republican assemblymen saved them from last year. The Tammany program is full of unsound economic and political doctrines, based on an appeal to the unthinking emotions of the people. It called for wasteful expenditure of the people's money without any real benefit in return."

"Republican men and women must work from now until election day to really protect the best interests of the state."

A meeting of the Republican Women's State Executive Committee will take place on Friday, September 28th at the Women's National Republican Club, 38 West 39th street.

Miss Butler will go to Rochester on October 2, for a dinner in honor of Mrs. Bert Van Wie, who recently resigned as vice-chairman of the Monroe county committee to become a candidate for re-election on the county school board.

The entire women's state executive committee has been invited to attend this dinner.

On October 2 and 3 a conference of the Republican women county leaders of the seventh and eighth judicial districts will take place in Rochester.

The Carriage County Republican organization is planning to have a school for voters in Auburn on October 4 and 5.

SALVATION ARMY HARVEST SALE

The annual harvest home sale will take place at the Salvation Army Hall, Friday and Saturday nights, September 28 and 29.

The Salvation Army in America is making strenuous efforts to raise one million dollars to be used for relief work in Japan where its work has been operated for about twenty years. Miss Booth, commander, at a conference with leading Salvation Army officials, several weeks ago, decided that all income from harvest festivals all over the United States should be used for Japanese relief. Miss Booth said, "We will start this with our own people, and every Salvation Army officer, married or single, must give five dollars. Single officers whose salary averages from \$10 to \$13 weekly, \$5.00 and married officers, whose salaries range from \$20 to \$25, according to the number of children in the family under 16 years, \$10.00. Each Salvation Army member is asked to give one dollar and the entire proceeds from the harvest festival will help greatly."

The "Elks" who have so nobly stood by the Salvation Army in all of its appeals, have helped in this last effort of relief in a large way. The local lodge has sent their check for \$50 to Captain Newton for Japanese relief.

Donations of fancy work, food-stuffs or cash will be received at the Salvation Army Hall all of this week for the sale on Friday and Saturday. Checks may be mailed to Captain E. Newton, marked "Harvest Festival" or "Japanese Relief."

On Sunday night there will be an enrollment of soldiers at the auditorium, 90 North Front street.

Everybody is cordially invited. Captain Milton McMahon of New York city will be present.

Never Mind the Sign.
 The tired business man had been made unusually so by sitting through the entire performance at the theater without a smoke. Waitlitz in the lobby, while his wife put on her hat and powdered her nose, entirely ruined what was left of his disposition. Stopping a fair usher, he demanded in a hard-boiled tone, "Where the hell is the men's smoking room?" "Go right down this hall," she replied sweetly, "and turn to your right. You will see a sign that says 'Gentlemen.' Don't pay any attention to the sign. Go right in."

The Addict.
 Among Jimmie Malden's favorite stories is the one concerning two gentlemen who were getting acquainted through the medium of casual conversation. "Do you play golf?" inquired one of them. "No," said the other. "but I can't give it up."

New Pressed Effect Is Feature of This Frock

Showing a new black satin afternoon frock with the new pressed effect for trimming.

Fall Fashion Ideas of Interest to Women

An unusual coat is of black crepe embroidered in silver, with a collar of plated silver cloth.

A stunning jacket is of black velvet cut out in eyelet work and embroidered.

As new as they are smart are frocks of brown georgette embroidered in gold, silver and gunmetal thread.

The new sleeveless sweaters are particularly lovely in yellow or in white striped in green.

A square shawl of glove silk has mits to match. These come in different colors.

Yellow is one of the leading colors at the moment, with green a close second in popularity.

High collars are featured on some of the new straight-line frocks for early fall. Frequently they fasten on one side with a row of buttons from shoulder to hem.

Most attractive sweaters of medium-weight yarn, silver glow, wonder glow or shetland floss, are trimmed at the bottom of the coat and sleeves with peasant embroidery in gay wools.

Almond-green is mentioned as the new shade employed by the French, with some little cerise shown as well, but the black, wood and pheasant, and, in fact, all of the brown tones, are mentioned as very largely employed for the new season.

The popular furs this season will be bobbed haired and blonde, like many of their wearers. Astrakhan will be an especial favorite as will mole and kolinsky. One of the novelties is Bama marten which is the skin of a rare species of monkey found in Africa. Reindeer will be used for short coats to wear with tailored suits.

A new fall model that is worthy of attention from the woman who likes to make her own hats employs all the forest shades of ribbon in the making. The shape is Napoleonic and the foundation material is velvet ribbon. Across the front are a number of conventionalized forest flowers, both narrow and scalloped edged and golden-brown metallic ribbon being used to achieve the desired floral effect. In addition to many yards of narrow wood-shaded velvet ribbon which wind their way through the design, without rhyme or reason.

Creations of Net and Ribbon Are With Us

Net dresses are with us again, and are more charming than ever before with their variety of ribbon trimming. Here are some of the newest models in net and ribbon creations.

A white net is trimmed with rows of narrow white taffeta ribbon having a silver picot edge. The ribbon runs about the skirt in five parallel rows. Three rows of the same ribbon run down the center front vertically with two rows on either side. The bodice is likewise decorated with parallel and vertical rows of ribbon, some crossing over and some under at points of intersection. The girdle is of two-toned silver and white ribbon, tied in a huge bustle bow without streamers in the back.

Another net frock is in shades of clover. The net itself is the usual clover shade while the ribbons that edge every one of the three tiers of ruffles that make the skirt are of varying clover shades, such as one sees in driving along the beautiful country roads in summer. The sash for this is two-toned, old blue and clover, and is a startling, but smart note to the frock. The soft ribbon is looped into a large wheel from which dangles a single streamer culminating in a beaded tassel near the bottom of the skirt. The bodice has two small ribbon-edged ruffles about a low neckline and two more ruffles at armholes that do away with any necessity for sleeves.

Tunnel Far Above Sea Level.
 One of the most wonderful of railway tunnels is the trans-Andean, in South America, which was opened in 1905. This great tunnel, which affords direct rail communication between Argentina and Chile, is only five miles in length, but it surpasses all others in being 12,000 feet above sea level.

HE WAS GAME TO THE LAST

Dying Book Agent Pines His Profession With Sorrowing Friends and Even Tactics Undertaker.

The book agent was dying. (They are tough, but they die) "It is hard, very hard," he muttered, "to have death come just as I had been given the exclusive right to canvass Hayseed county for Russett's Universal history—a work that was bound to sell like hot cakes."

Then glancing at his sobbing friends who stood round his bedside, he said: "Soon all that will be left of men will be a faded memory. I shall have departed, as Shakespeare—whose works, in 15 volumes, half Russia, come at \$2 a volume, or \$24 the set—remarks, 'to that bourne from which no traveler returns.' But do not weep. I have only one last request to make. Promise me that you will grant it."

"We will," replied all present, in choking accents.

"I have your word—yours, Uncle John, and yours, Aunt Maria, and Bill's, and Cousin Jimmie's, and Doctor Slaughter's?"

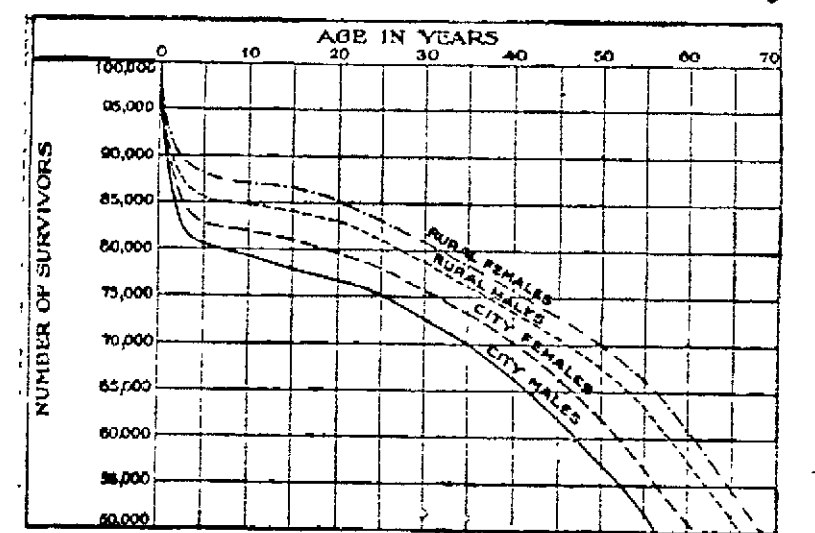

"You have," was the unanimous response.

"Then," said the dying man, with a look of contentment, "I shall have you all put down for a set of Strawpaper's magnificent 'History of Fakes and Superstitions,' in 12 volumes, full morocco, at \$26 the set. The entire work will be delivered to you with a week."

One by one the sorrowing friends fled out, too full for utterance. "That little stroke of business will get me an A1 monument," said the book agent to his wife. "And now, suppose you send round for the undertaker, and I'll see if I can't land him for a set of the Blarney library at \$90, and get him to take it out in trade."

Elephant More Intelligent Than Dog.
 Some idea of an elephant's capacities may be reached by comparing him with the dog, with whose intelligence we are familiar. Making allowance for the dog's "opportunities" under man's training, science has come to doubt whether the most exceptionally intelligent dog possesses comprehensive faculties equal to those of the adult wild elephant fresh from the jungle.

American Women Outlive Men Is Fact Shown by New Survey

THE average woman of America outlives the man. All that is necessary is to follow a downward line until it hits one of the arcs and then run your eye over to the total of survivors at that point. For example, at the age of fifty, there are 70,000 of the original 100,000 rural females surviving; about 63,000 rural males surviving; about 33,000 city females surviving; and about 27,000 city males surviving. City dwellers die faster in the first five years of life, and the advantages of country life in those years are never overcome, as the graph shows. From the age of thirty-five to fifty the mortality among city males and females runs in parallel and at a slightly faster rate than the mortality of their country cousins.

All Cooks Look Alike

to the hungry man, but what a sad disappointment when the "kitchen queen" quits suddenly and the table looks anything but satisfying to a zealous appetite. When in doubt as to what to do, use The Freeman's "Help Wanted" Cent-a-Word Department.

WORLD'S GREATEST BANKING SYSTEM

By CRAIG B. HAZLEWOOD
President Association of Reserve City Bankers

Conceived in the spirit of common good, for the best interests of government, banks and public alike, based on broad and correct principles relating to the nation's currency and credit, the Federal Reserve System represents the greatest piece of economic legislation enacted by an American Congress.

The System's record of achievement through a world war, an inflation period of dizzy heights, and months of serious and costly liquidation. It is a matter of greatest importance that very earnest and patriotic thought be given to the two questions: How far has the system succeeded, and in what particular has it failed, to give our country as strong and as useful a financial system as human mind can devise?

The hope and expectation of those who framed the Federal Reserve Act that the machinery set-up for the origination, distribution and automatic retirement of currency issue, which should be entirely responsive to the needs of trade and the varying conditions of business, have been wonderfully well realized. Every possible effort must be exerted to preserve the Federal Reserve System from political alliance and to keep its powerful influence entirely devoted to the building up of the greatest banking system in the world.

The first bank of the United States was established in 1791 and failed to obtain a renewal of its charter in 1811, the opponents charging that the bank was a "money trust" controlled by foreigners, a tool in the hands of the Federalists, and that the act chartering the bank was unconstitutional. Note the use of the words "money trust." We have the idea that this is a modern term. The suspicions which animate the demagogues today have not changed in a century.

The second bank of the United States was chartered in 1816 and failed to obtain a renewal of its charter in 1833, the reasons being a widespread belief that the bank was unconstitutional, the hostility of the states, the opposition of the state banks, the rise of democracy, and the envy and hatred which the poor always feel toward the rich.

Both banks functioned well and accomplished much for the country during crucial times. The downfall of both was caused simply and solely by attempts to place the determination of banking policies in the hands of political authorities.

The delicate handling of currency and credit, to the high end that the best interests of all may be served with special privilege to none, cannot be left to others than those who are competent through proven judgment and experience. The danger of politics in the Federal Reserve System is a real one; upon us is placed the grave responsibility of forever keeping the great system clean.

When the savings pass-book comes into a man's life to stay the red flag goes out. What the country needs is to bring about a condition whereby the man who works with his hands shall take the same interest in his affairs as the capitalist does in his. Probably the best way to do this would be to turn the workman into a capitalist. And this is exactly what he becomes when he saves his money and builds up a reserve fund. He remains a capitalist as long as he lives on that money. The satisfaction of seeing his money reserve mount up will discourage the worker to take a layoff now and then. It will encourage him to work a full six-day week and thereby increase the labor hours applied to production.

The American people can solve any problem they set themselves to. We provided for a sound currency when the greenbackers and inflationists were routed and the gold basis established. The Federal Reserve Bank was established and solved a problem for which most people thought there was no solution. A number of years ago, when there was a crisis or when a bank failed, we all used to shut up our vaults tight and let nothing get out. Instead of bettering conditions we made them worse. Now it happens that few people, except those directly interested, are disturbed.

Perhaps the most important problem of all right now is to do away with labor waste. It never can be done by preaching, by agitation or by force. It can be done by selling the workman on the idea of becoming a capitalist. This can be brought about by the right kind of bank advertising. Who is there to say that an advertising dollar bringing about this result would not be a constructive dollar?—Festus J. Wade.

And longer than most. In the end, now ever, there was nothing for him to do except to join the retreat. He found himself back in Washington the next morning.

Going up to the capitol, he was soon surrounded by a score or two of congressmen to whom he was describing incidents of the battle and of the rout.

"Who told you about all this?" asked one congressman who had come up too late to hear the beginning of Logan's story.

"Why, I was there myself," was the reply.

"You were there?" exclaimed the congressman. "Why, were the cars running out that way?"

"No," said Logan with a grim smile. "The cars were not running, but everything else in my vicinity was."

—Youth's Companion.

Old Southern Hospitality. In 1852 my father left Bavaria for America. "Go south," was the recommendation. Acting on this suggestion, he went to Oglethorpe, Ga. Through acquaintances he made a connection with two brothers, Kaufman, who plied the peddlers' trade. They owned a peddlers' wagon, with which they dispensed through the several counties of the state an assortment of dry goods and what were known as Yankee notions.

It was not like the peddling of today. Because of slavery there were on the large plantations often more colored people than there were whites living in the near-by villages. The itinerant merchant, therefore, filled a real want, and his vocation was looked upon as quite dignified. Provided only, therefore, that the peddler proved himself an honorable, upright man who conscientiously treated his customers with fairness and made no misrepresentations regarding his wares, he was treated as an honored guest by the plantation owners—certainly a spirit of true democracy.—Oscar S. Straus in the Outlook.

Uninjured. The toughest customer in Bloody Gulch had been hurled from an automobile into a ditch and lay unconscious for a couple of hours. He came to life to find the face of a friend bending anxiously over him.

"Are you hurt, old man?" gasped the friend.

"Not a bit," replied the hard guy, "only a little spill. But say, Bill, will you help me pull this bone back into my sleeve?"—American Legion Weekly.

Scarcely Complimentary. Some time ago a person in an industrial town arranged a special service for working men.

The service was well attended and the preacher began his sermon with the remark: "Barley indeed have I been privileged to address so many tons of soil."

A Line on Values. "Fifteen cents for a quart of blackberry?"

"Yes, mum."

"You mean,"

"Yes, mum."

"Did you ever try picking a quart?"

"No, I never did."

"I advise you to try it."

HOME ENTERED AT ELLENVILLE

Owner Rose Was There Which Thief Hadn't Expected and He Made Quick Getaway.

An attempt was made to rob the home of William C. Rose at 155 South Main street, Ellenville, early Saturday morning but the burglar was frightened away by Mr. Rose and so far as is known nothing was taken. Undersheriff Tunis Haukenbeek was called to Ellenville Saturday to make an investigation and if possible secure fingerprints of the criminal.

Mr. Rose who had been away on a trip for a few days returned home Friday morning and it is thought that the person who broke into the house did not know of Mr. Rose's return. Shortly after 2 o'clock Saturday morning Mr. Rose was awakened by a noise in his bedroom and arose and turned on the electric light. A man was standing in the room near the fireplace and when Mr. Rose jumped from the bed and turned on the lights the burglar made a dash for the open door and ran down stairs. Mr. Rose followed and pushed the light switch which lighted up the lower hall. The burglar however was making too good time to be identified and disappeared through a window on the lower floor which had been forced up to gain entrance.

An investigation showed that the safe on the lower floor had been opened but nothing had been taken. Admittance had been gained by prying up a window with a knife.

It is thought that the job was a local one and the thief knowing of Mr. Rose's absence for a few days sought to take advantage of it but when he discovered the house was not empty made a hasty exit before taking anything.

No fingerprints could be discovered as the burglar had been careful not to touch the glass of the window when prying open the window.

Elephant's Generosity.

An interesting incident occurred at the elephant house at Franklin park, Boston, late one afternoon, showing unusual kindness on the part of one animal for another, writes a correspondent of Dumb Animals. "Molly" and "Tony," the two large elephants, had been supplied with a generous amount of hay for their supper, but none had been given to the little baby elephant in the adjoining section, which was separated from that of the larger animals by wooden bars and railing. After a time Molly apparently noticed that the youngster had nothing to eat, and she gathered up a mass of hay with her trunk from her own supply, and moved over and placed it down beside the bars separating the "Baby," so that the little fellow could reach it through the bars with his trunk, which he speedily did. This somewhat discounts the stories current about the jealousy on the part of the larger elephants toward the little fellow.

Mozart in Unknown Grave.

Mozart's body was buried in a "common grave" in the plainest manner possible, with nobody present except the keepers of the cemetery. Weeks later, when the wife visited the spot, she found a new grave digger, who could not tell where her beloved husband was buried, and to this day the author of 14 Italian operas, 17 symphonies and dozens of cantatas and serenades, about 800 compositions in all, sleeps in an unknown grave. Salzburg, Austria, waited a half century before she erected a bronze statue to her world-renowned genius in the square of St. Michael, and 70 years after his death Vienna built him a monument in the cemetery of St. Mark. History scarcely furnishes a more pathetic life. "He filled the world with music, yet died in want and sorrow," says a biographer. He died December 4, 1791.—Current History Magazine.

Rubber is Composite.

That rubber as it serves you is no direct tree-to-home affair, but that more than 500 different pigments and ingredients enter into it to make it usable, is pointed out by the chemical engineers of one of the tire manufacturers of Akron. These, he says, are vital to produce rubbers that meet the varying demands for toughness, elasticity and hardness. The rubber in the rubber band, the heel on your shoe, or the treads on your tires are not just simple vulcanized mixtures of rubber and sulphur. The compounds are complicated, they have long since passed from the stage of simplicity which they occupied practically until the development of the automobile got under way.

Avoid Idea of Fear.

There is nothing so ingenious as fear; it is even more ingenious than hatred, especially when its concern is with the preservation of money.—Bayle St. John.

LOUIS' Tuesday Night DANCES

Beginning Tuesday, Sept. 25th, and Continuing Through the Winter.

Come One, Come All

CLERMONT HALL,

Cor. Wall and John Sts.,

KINGSTON, N. Y.

Imperial, Kingston's Jazz Artists, Will Play "Boogie Woogie."

Remember Louis' other dances, Don't Miss Any, Better "A" Show, If You Don't Enjoy Yourself at Louis' Dance, SEE A DOCTOR.

BIG NIGHT, ONLY 50c

Always a Real Good Time

TRANSPORT ON NEW TIME SUNDAY

A new time table goes into effect Sunday, September 30, on the Kingston and Rhinebeck ferry. Every day but Sunday the first trip from Kingston will be made at 7 a. m., and at forty minute intervals thereafter up until 10:20 o'clock at night, when the last trip from this side will be made. The first trip from Rhinebeck every day but Sunday will be made at 7:20 a. m. and will be continued every forty minutes until 10:40 at night when the last trip will be made. On Sundays the first two trips run on the week days will not be made. The first trip on Sunday therefore from Kingston will be at 7:40 a. m. and from Rhinebeck at 8 a. m.

CURRENT OFFERINGS AT THE THEATERS

The new Paramount picture, "The Covered Wagon," which has already won the greatest success of many seasons in New York, Boston and Los Angeles, is now at the Kingston Opera House. Beside the stirring dramatic incidents of the Emerson Hough narrative, the thrilling beauty of the scenes, and the exciting episodes of the prairie fire, the Indian attack and the perilous fording of the treacherous Platte river by the wagon train, the picture carries a message of high patriotism. No one can see "The Covered Wagon" without gaining a new understanding of the courage and idealism of those brave souls who created the civilization of the west, nor can anyone escape a feeling of pride that these men and women were the forebears of the true American of today. The musical accompaniment to the picture, arranged by Hugo Reisenfeld, is played by an orchestra of sixteen pieces. There are two performances daily at 2:30 and 8:15.

An appeal to the lover of the artistic and picturesque is Mack Sennett's "Suzanna," starring Mabel Normand at Keeney's tonight and Tuesday.

Against a background historic and romantic, "Suzanna" faithfully depicts the charm, romance and fruitfulness of California about 1835.

Mary Miles Minter in "Dreams of Fate" is the feature at The Auditorium today. Also the 17th episode of the Oregon Trail.

Merriment galore will feature the Orth and Coleman Tip Top Merry-makers' presentation of a laughable musical revue entitled "Joy and Gloom," at the Orpheum, commencing today. The feature picture is a first run Paramount of 1923, "Lawful Larceny," with Hope Hampton, Nita Naldi and Conrad Nagel.

Unique Distinction.

The only instance of a deliberate suicide in the Old Testament is that of Ahithophel, counselor to King David, and of Absalom. His counsel was slighted and he hanged himself 1023 B. C.

Parted at the Altar.

English Paper—"The Duke of —" was among those present at the marriage which, being a mixed one, lasted only a few minutes.—Boston Evening Transcript.

Many Victims of Wild Beasts.

China, thanks to her long history, has been able to rid herself of the most dangerous animals; but in Korea a local species of tiger, perhaps the largest and fiercest in the whole family, annually kills 2,000 peasants. Siberia, again, is affected by the ravages of wolves and bears, whose victims run into thousands every year.

Eugenics.

A lecturer says that before people are allowed to marry their ancestors should be known—which makes us think what a blessing it would have been if the parents of the Lincolns, the Franklins and a host of other obscure families had looked up each other's ancestors and then decided not to marry.—Boston Transcript.

Peculiar Combinations.

An English woman recently wrote to a newspaper saying that she was born A. Mann (Alice Mann). She married a Mr. Husband, and so became A. Husband. He died and she married again, this time a Mr. Malden. Becoming a widow for a second time, she concludes that, though born A. Mann, she will die A. Malden.

China, thanks to her long history, has been able to rid herself of the most dangerous animals; but in Korea a local species of tiger, perhaps the largest and fiercest in the whole family, annually kills 2,000 peasants. Siberia, again, is affected by the ravages of wolves and bears, whose victims run into thousands every year.

Eugenics.

A lecturer says that before people are allowed to marry their ancestors should be known—which makes us think what a blessing it would have been if the parents of the Lincolns, the Franklins and a host of other obscure families had looked up each other's ancestors and then decided not to marry.—Boston Transcript.

Peculiar Combinations.

An English woman recently wrote to a newspaper saying that she was born A. Mann (Alice Mann). She married a Mr. Husband, and so became A. Husband. He died and she married again, this time a Mr. Malden. Becoming a widow for a second time, she concludes that, though born A. Mann, she will die A. Malden.

China, thanks to her long history, has been able to rid herself of the most dangerous animals; but in Korea a local species of tiger, perhaps the largest and fiercest in the whole family, annually kills 2,000 peasants. Siberia, again, is affected by the ravages of wolves and bears, whose victims run into thousands every year.

Eugenics.

Joseph and Dorothy Kline.

After a 10-year hunt that took him into every state in the Union on seven trips across the continent, Joseph Kline has just been reunited with his 15-year-old daughter, Dorothy, who had lived most of the time within a few blocks of her father's home in Cleveland, Ohio. When Dorothy was one year old her mother died, and her father placed her in a home, while he travelled in the west. Returning several years later, he found she had been adopted, but through an error all trace of the foster parents was lost. He found two other children he had left with relatives, but though he spent a fortune he could find no trace of Dorothy. Adopted by a Cleveland family at the age of four, Dorothy did not know her foster parents and she did not remember having been in before. She saw a house—the orphanage—she remembered and she entered. When she told who she was her father was notified, and the foster parents have agreed to give her up.

DEALERS AND PAINTERS INVITED.

BIG PAINT SALE STILL ON

Our \$5,000 Stock of PAINTS, WALL PAPERS and GLASS must be sold quickly as we are going out of business. Everything sold Below Factory Cost. This is Fall Painting Time. Note the Prices:

MORE MONEY IN CIRCULATION

Than at Any Time Since War, Say Bankers—Cities Prosper But Some Rural Districts Are Economically Depressed.

By Telegraph to The Freeman.

Atlantic City, N. J., Sept. 24.—Prosperity in the larger cities of the United States, but economic depression in the rural districts is emphasized by members of the American Bankers' Association which is holding its annual convention here this week.

The highest wages in history are being paid in the cities, where much construction work is under way. There is a scarcity of skilled labor and very little unemployment. Workers are depositing their earnings in banks and more money is in circulation now than at any time since the war; the city bankers say.

Poor crops, resultant unemployment and low prices for their products has brought depression to the farming sections, particularly the southwest, those from the country point out.

The European situation and the "political rampart" are blamed for conditions in the agricultural sections. Few of the bankers believe that additional legislation will have a remedial effect.

There is, however, a feeling of optimism in those sections hardest hit by the wave of depression. The fall yield of crops has encouraged the farmers and banks are loaning money on the belief that better prices will be gotten for the output, thus stabilizing conditions.

J. H. Duellinger, president of the association, president of Marshall & Hisey Bank, Milwaukee, Wisc., says: The two-sided view given of the country as a whole by the greater degree of optimism expressed by the city bankers than by the country bankers is significant and is an accurate reflection of the more rapid improvement that has occurred in commerce and industry than in agriculture. Despite this unevenness, business in the middle west in general is good. We may hope that it will continue to improve if sanity continues to control and the rural districts are not misled into believing that the answer for their problems is to be found in special legislation instead of in the normal working out of economic processes.

In so far as improvement for agriculture is dependent on European conditions, it is encouraging to note that, while many great difficulties in Europe remain unsolved, some of the major underlying causes of unsettlement have been corrected. The people of Europe are restoring agriculture and becoming better able to feed themselves with less dependence on us. This is one of the very factors that have reacted against our own agricultural prosperity. The answer, of course, is that it will be necessary to revise our own agricultural plans to conform to this new condition. With the recognition of such problems as these and the development of means to meet them, I believe we can look forward with confidence.

Walter W. Head, president, Omaha National Bank, Omaha, Neb.: Agriculture is recognized as one of the great basic industries, therefore, it is of prime importance in making an estimate or forecasting financial and economic conditions.

For this reason I take particular pleasure in reporting a marked improvement in general farm conditions during the last twelve months. A large corn crop and more than normal yield of miscellaneous small grains make up, to a large extent for the light crop of wheat and the low prevailing prices for same.

Live stock is again being produced and sold at a profit. The farmer who is not over-capitalized by virtue of having paid extravagant prices for his land is making satisfactory progress. The farmer who bought land at the peak is having difficulty in making ends meet. The latter class is in the minority.

Let us remember that it is much more difficult for the farmer to squeeze the inflation out of his high priced land than it is for the merchant to take his liquidation losses. The farmer's investment is almost entirely in his physical plant and his turn-over is made but once a year. This improved situation has necessarily brought about an easier financial condition in the great agricultural section of the United States.

Records of the War Finance Corporation speak well of the extent of recovery, as in most agricultural

states its loans have been materially reduced, if not almost liquidated. This slow but steady restoration of economic stability is true to a large degree in the country as a whole. A close personal observation indicates that the temporary depression of the last few months has served its purpose; that the tendency to dangerous inflation has been properly checked, and that the next twelve months promise to be a more prosperous period than we have experienced since 1919—prosperity built upon a permanent improvement of agricultural conditions.

Charles H. Sabin, Chairman of the Board, Guaranty Trust Company, New York: At the opening of the fall season the business situation is characterized by an attitude of generally increasing confidence. Substantial basis of this hopefulness are evident. The reaction around the mid-year in commodity and security markets, accompanied by reduced activity in many lines of industrial production, have had a clarifying effect. But tendencies which had appeared earlier have yielded to the influence of a salutary spirit of discriminating caution and conservatism in the matter of future commitments, with the result that the bases of continued prosperity have been strengthened.

Now the trend of commodity prices is again definitely upward, and this cannot fail to have a stimulating effect upon general producing activity. Both wholesale and retail trade have been well sustained throughout the summer. Not only have total freight car loadings established a succession of new high records for all time, but the loadings of merchandise and miscellaneous commodities, reflecting more accurately than total loadings the movement of goods to ultimate consumers, reached in the latest week reported a figure more than 4,000 in excess of the previous record.

Few excessive inventory accumulations, either by producers or distributors, have developed. And, with production schedules conforming closely to the actual requirements of trade, any general expansion in consumption must be promptly reflected at mills and factories. The banking situation has remained eminently strong. Even in financing a record volume of production and trade only moderate resort to rediscounting at Federal Reserve Banks has been required. The unfavorable effects of low relative prices of farm products constitute no general restraint upon trade. Not all prices of farm products are depressed. Prices of cotton and tobacco, among the more important crops, are high and the price of corn is fairly in line with general prices. The market for wheat shows considerable recovery from the low point reached in the summer. Altogether, the value of this year's crops promises to exceed by a considerable margin that of last year's harvest. On the whole, the economic position of the farmers this fall, it appears, will be better than at any time since the break in prices in 1920.

QUOTATIONS AT PUBLIC MARKET

The rain storm of Sunday kept down the attendance at the public market on Field Court today, but all produce sold out early.

Quotations:

Peaches—No. 1, yellow, \$1.50 to 1.60, No. 2 yellow, \$1.25 to 1.35; No. 3, yellow, 80c. to 90c.
Tomatoes—50c. per basket.
Cauliflower—\$2.25 to 2.50 per dozen.
Potatoes—\$2.00 per bushel.
Beets—40c. per dozen.
Carrots—35c. per dozen.

ACTRESS PRESSSES CLAIM

AGAINST HANNA ESTATE

By Telegraph to The Freeman.

White Plains, N. Y., Sept. 24.—Miss Jane Avis Evans, an actress, today renewed her legal battle to force the executors of the estate of the late Daniel R. Hanna, millionaire newspaper publisher of Cleveland, to pay her \$1,250 a month for life, it was announced, the provision Hanna made when, she charges, she released him from his promise to marry her.

Denied her request for a jury trial when she filed her claim following probate of Hanna's will on January 10, 1922, Miss Evans through her attorneys, has now filed papers with Surrogate George A. Slater, specially citing the Hanna estate executors to show cause why a judicial settlement of their accounts should not be made immediately.

The citation, returnable September 28 was served on Mark A. Hanna, Carl M. Hanna and Daniel R. Hanna, Jr., executors of their father's estate, valued at over \$10,000,000.

Miss Evans charges Daniel R. Hanna promised to marry her, and later asked release from his promise in lieu of which he agreed to pay her \$1,250 a month during her life.

When the actress's claim was first filed with the executors they rejected it.

AT Y. W. C. A. TONIGHT

AND TUESDAY EVENING

This evening there will be given at the Y. W. C. A. Headquarters, a party in honor of the Membership Committee of the Y. W. C. A., by whose efforts the charter membership will reach the amazing proportions of over 1,100 paid members.

Tomorrow evening, at twenty minutes of six, the Summer Sociability Club and their friends will meet at the Y. W. C. A. Headquarters, for an outing at the Kijkuit, every one attending, taking their picnic supper with them.

School Women to Meet.

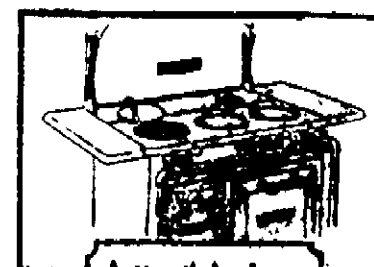

On Saturday there was a meeting of the executive committee of the School Women's Club of the Hudson Valley held in this city. At that time arrangements were made for the coming fall meeting of the full club to be held in Newburgh on Saturday, October 20th.

Stall for Papyrus.

Travelling amid luxuries never before known for a horse, Papyrus, three-year-old winner of the English Derby, is on his way to America for the \$100,000 race against the best American three-year-old, which will be either Zev or My Own. Just before sailing, Papyrus, badly cut at the start, was beaten for the St. Leger Stakes, and Englishmen are betting 1 to 1 he will be defeated in the United States. The race will be run at Belmont Park, New York, on October 20. On the journey to America Papyrus had a loose box, surrounded on all sides by pneumatic cushions, as shown above. Bar Gold, his stable mate, is keeping him company. The cost of his cabin was \$2,500.

Ward Jury.

Here are the twelve men who will decide the fate of Walter S. Ward, millionaire New York baker, now on trial at White Plains, N. Y., on the charge of murdering Clarence Peters, an ex-marine, whom he shot to death in what he alleges was a blackmail plot.

Don't Clean House

and put down your old hall and stair carpet until you have seen our new stock of velvet tapestry hall and stair carpets, with and without borders—at \$2.50 per yard. These same carpets sold for \$3.00 per yard a year ago—and are probably down to rock bottom now. Our stock of genuine Wilton Rugs is very large at \$125.00 to \$140.00.

Wilton Velvet at \$75.00 and \$85.00 each, in size 9 ft. x 12 ft.

PRESSMEN IDLE AS WEEK STARTS

By Telegram to The Freeman.
New York, Sept. 24.—New York entered the second week of the pressmen's strike today with the local union still defying the international organization and the publishers still issuing curtailed joint editions.

Answering a call of George L. Berry, president of the International Union, pressmen began arriving today from other cities. The first came from Toledo and others came from points as far as Indianapolis and Louisville.

Thirteen hundred of the city's 2,500 pressmen voted to continue the strike until the publishers recognize the local number which has been outlawed by Berry. The publishers refused to deal with the strikers.

REAL ESTATE TRANSFERS.

WARD'S WIFE ON WITNESS STAND

Says He Came Home Between 4:30 And 5 O'clock On Morning Peters Is Said To Have Been Killed.

By Telegram to The Freeman.
Corthouse, White Plains, Sept. 24.—Mrs. Beryl Curtis Ward today unwillingly took the witness stand against her husband, Walter S. Ward, charged with the murder of Clarence M. Peters, and for fourteen minutes played the part the state demanded of her in its effort to send the accused man to the electric chair.

The state's point scored through Mrs. Ward was that her husband did not reach his home until between 4:30 o'clock and 5 o'clock on the morning Peters's body was found on a lonely county road nearby.

About the Folks

Valentine Kraus is seriously ill at his home on Stephan street.

Mr. and Mrs. George Burger of No. 611 Delaware avenue are receiving congratulations over the arrival of a son, Harold.

Mr. and Mrs. LeGrand Hotelling and daughter, Miriam, have returned home after spending some time at the Vista, Hahes Falls.

Mr. and Mrs. Edward E. Hall of New York city spent the week end at the home of their aunt, Mrs. Elizabeth Lowe, on Cottage Row.

Joseph H. Jacobson, painter, of 75 Cedar street, has returned from a three weeks' vacation spent at Atlantic City, and has resumed his work.

Mr. and Mrs. William Burmeister and daughters, Helen and Margie, and Elsa Emig, who have been on a motor trip to Schenectady and Saratoga Springs, have returned home.

Mr. and Mrs. G. S. Breidenberg and son, Harold, of Everett, Mass., who have been visiting Mrs. Breidenberg's mother, Mrs. C. Rhymer, at 366 Broadway, returned home by auto.

Mr. and Mrs. Edward E. Elmen-dorf and daughter, Margaret, of 270 Fair street will go to Elmira Tuesday, where Miss Elmen-dorf will enter Elmira College. Miss Elmen-dorf is a graduate of Kingston High School.

Odds and Ends

The date of the Clinton Avenue M. E. Church chicken pie supper has been changed from October 31 to November 7.

The ladies of Circle No. 4 will meet with Miss Millard, 244 Albany avenue, Tuesday evening. Please bring your own sewing.

Thomas Vinter of Delaware avenue is installing a "Magic Service Fuel Saving Furnace." The work is being done by the Canfield Stove Company.

The Young Women's Missionary Society of the Clinton Avenue M. E. Church will meet at the home of Mrs. Newell Cranston, No. 201 O'Neil street, tonight, at 8 o'clock. Members are requested to bring mite boxes.

BERRY ORDERS OUTSIDE PRESSMEN "DRAFTED"

By Telegram to The Freeman.
New York, Sept. 24.—George L. Berry, president of the International Pressmen's Union today sent a telegram to heads of locals throughout the country instructing them to "draft" newspaper pressmen and dispatch them to New York immediately.

A gratifying response has been made to a previous telegram, Berry said. "Many loyal union men have already arrived and many others are enroute," he stated.

MISSIONARY PROGRAM AND ANNUAL DRIVE CAPTAINS

Although the night was stormy on Sunday the missionary service at Franklin Street A. M. E. Church was fairly well attended. It was literally one of the best programs presented by the society, full of inspiration that deeply produced the spirit of missionary work in the church.

Pleasing selections were rendered by Raymond Crispel, Miss Anna Van Derzee, Miss Roseline Fitzgerald, Miss E. Wootton, Mrs. M. Walker and H. Van Derzee. The service was led by Mrs. E. O. Clarke. Mrs. Fanny West, Mrs. Charlotte West, Mrs. E. McKinnon and Mrs. Anna Fitzgerald acted as ushers. At the conclusion of the service the captains of the annual drive of the church were announced which are as follows:

Captain, No. 1, E. O. Clarke.
Captain, No. 2, E. McKinnon.
Captain, No. 3, R. Wade.
Captain, No. 4, W. Van Dyke.
Captain, No. 5, Annie Wilkes.
Captain, No. 6, C. Marble.
Captain, No. 7, N. West.
Captain, No. 8, H. Van Derzee.
Captain, No. 9, J. Cantine.
Captain, No. 10, Eula Hubbs.
Captain, No. 11, Minnie Walker.

A list of who is who in Zion will be published in the subscription list by the secretary.

Friday evening, September 28, a special concert and lecture will be given by the captain of No. 8 club, James Cantine. The pastor will deliver the lecture on his recent southern trip.

An Ambulance Call.

This morning Anna and Edward Long, the children of Robert Long, were removed from the family home, No. 68 Emerick street, to the Kingston City Hospital in the ambulance.

At offering price, this stock is an excellent earner, with exceptional speculative possibilities.

FINANCIAL AND COMMERCIAL

By Telegram to The Freeman.
New York, Sept. 24.—The stock market opened steady today, most stocks registering fractional gains.

U. S. Steel yielded 3/4 to 1/2. Bethlehem Steel rose 1/4 to 49. Gulf States 1/4 to 76. Baldwin 1/4 to 55 1/2. Anaconda 1/4 to 38 1/2. Studebaker yielded 1/4 to 100 1/4 and U. S. Rubber 1/4 to 38. Sugar stocks opened firm, Cuban American rising 1/4 to 32 and American Sugar 1 point to 65 1/4. Oil stocks opened active and steady.

Pan-American Petroleum gaining 1/4 to 57 1/2. Cosden 1/4 to 24 1/2. Marland 1/4 to 22 1/2 and Sinclair 1/4 to 18 1/4. Baltimore and Ohio at 51 1/4 and Erie first preferred at 22 1/4 were up 1/4. Southern Railway rose 1/4 to 33.

The former tone which appeared in the closing session of last week, became more pronounced in the forenoon trading. The highest prices were reached in the first hour during which period activity was most pronounced.

Many stocks lost their early gains and the inability of the market to hold its advance was utilized by the bear element in the afternoon trading. With the exception of the oil shares, which were steady, the market turned irregular.

Quotations given by C. E. Halsey & Co., 27 William street, New York City, branch office, Warren Building, 260-62 Fair street, Kingston, N. Y.

BULGAR REDS BEING SQUELCHED

Sofia Government—Belgrade Reports Cabinet in Near a Fall—Jugo-Slavs Send Troops to Border. Telegraph to The Freeman.

Sofia, Sept. 24.—Small scale fighting between communists and government forces was reported southeast of Maslych today.

The government claims to have put down the revolt.

Many rebels are still being pursued through the hills where they are numerous arrests continue.

During a communist raid M. Gulshof, a young architect and a brother of the wife of the Bulgarian minister to Czechoslovakia, was killed.

Nationalist feeling against the communists is growing stronger daily.

Belgrade, Sept. 24.—A ministerial crisis has developed in Bulgaria, according to a report from the frontier today. Minister of Justice Smiloff has resigned.

Jugo-Slavs has concentrated two divisions of troops along the southern frontier to prevent Macedonian raids.

The Bulgarian government asked when the troops would be removed.

Belgrade replied that the troops would be maintained in the border until the situation became tranquil.

A few isolated disturbances have been reported.

The Bulgarian government is reported to have issued a decree for mobilization of all reserve under-officers.

There will be a celebration of the holy communion on Thursday of this week at 10 o'clock.

On Saturday, the feast of St. Michael and All Angels, there will be a celebration of the holy communion at 9 a. m. Parishioners are asked to take note of the unusual hour, due to the rector's officiating at one of the other Episcopal Churches on the same morning.

The rector, the Rev. Edward M. H. Knapp, has asked all members of the parish to set aside the evening of Friday, October 5, when there will be a meeting of the entire parish at the parish house at 8 o'clock.

At this meeting reports of the year's work in the parish will be given, and plans for future church work will be made after a full discussion by the parishioners.

Lake Katrine Dance.

Tomorrow evening the usual Tuesday night dance will take place at the Grange Hall, Lake Katrine.

Clam chowder and other refreshments will be served during the evening. Music by an orchestra from Kingston.

Mathematics.

The question as to what the science of mathematics shall be said to be has been discussed by philosophers and mathematicians for some 2,000 years, but as yet a generally approved definition has not been formulated. A common definition, but one held in dispute, is that mathematics is the science of finding out how many and how much, or the science of measurement.

"Cut Yourself a Piece of Cake"

Played by Ted Lewis and His Band on Columbia Record A-3544 arouses a dance desire like the hunger for home-made chocolate cake.

And Jones and Hare sing it most appealingly on Columbia Record A-3544.

Buy Food Seriously—

especially bakery products, for the best is none too good for the stomachs of those who are dear to you and depend upon mother or sister to provide for their physical needs. Drake's Cake fills such a demand—it is the best that knowledge and art can produce—therefore it can be bought and be eaten seriously.

DRAKE'S CAKE

NOTICE TO CREDITORS—In pursuance of an order of Hon. George F. Kaufman, Judge of the County of Ulster, notice is hereby given, according to law, to all persons owing claims against William Cole, late of the City of Kingston, County of Ulster, deceased, to present the same with vouchers in support thereof, to the undersigned, Anna C. Cole, the Executrix of the estate of said deceased, at the office of DePuy Hasbrouck, her attorney, 235-240 Air Street, in the said City of Kingston, New York, on or before the first day of April, 1924. Dated, September 24, 1923.

The sea gulls of Venice, Cal., are protected by law because of their efficiency as beach scavengers.

Mrs. William Taylor

Above is a photograph of Mrs. William Taylor of Lynxville, Mass., where the recent death of her husband revealed the fact that "he" was a woman. Mrs. Taylor told officials that during the three score years of her "married" life she was never aware of her "husband's" deception.

WAS JUST LIKE THE REST

Teacher in Small Town Finds Every One Related to Every One Else.

I went to a small town to teach school, and found that every one seemed to be related to every one else. That cut me off from all chance for friendly gossip, for one could never tell when she would be gossiping in front of some adoring aunt or cousin.

I was explaining this, laughingly, to a girl in the town who had been nice to me.

She remarked: "Yes, that is so, but I am an exception—we have no relatives here outside our immediate family—you may gossip to me about any one."

"Well, the people I want most to gossip about are some new ones—don't know their name, but she calls him 'darling Double dear,' and they are too silly to be around sane people."

"Oh," replied my friend, "I had forgotten about my brother Don and his wife—they've been married about a month, but we don't think they are sillier than anybody else."—Exchange.

Pantomime 22 Centuries Old.

The word "pantomime" is about twenty-two centuries old, says the Cleveland Plain Dealer. It originally meant an actor and not the act. Literally, the word means the "mime" or imitator of everything, and imitate everything the old Greek and Roman actors could and did. Their plays were usually in dumb show, and movements and gesticulations formed the actor's chief art.

Later, the pantomime—which now has come to mean the act—was continued into the Middle Ages in the form of the play of Pantaloon, Columbine and Harlequin—Clown was a later addition—who are supposed by some scholars to represent the ancient deities of the original pantomime. A little later still, pantomime had turned into a ballet, still without words and still centering round Harlequin and the rest.

Hawthorne Respected in Ireland.

Whitethorn, or, as it is better known, Hawthorn, blooms in May. Its blossoms are much whiter than those of the blackthorn, and have a delicious perfume.

In Ireland Hawthorn is regarded with much respect as belonging to the fairies, and certain large trees all over the country are known as "gentry bushes," gentry being a name by which fairies are sometimes designated, says the Detroit News.

The cutting down of one of these old thorns was supposed to bring bad luck. In Sir Samuel Ferguson's poem, "The Fairy Thorn," reference is made to the disappearance of one Anna Grace, who went to a dance under one of the ancient bushes.

It is likewise believed that to carry a spray of Hawthorn into a house forbodes the coming of death to one of the inmates. In the south of England the fruit is called "pixies' pears."

Our Favorite Recipe.

"How may we evict the skunks from under our house?" is the somewhat startling question asked by a reader of an agricultural magazine.

Another reader, from the depths of a wider experience, answers the question thus: See that the wall is tight where they live, but leave an opening for them to go out. Take a bottle of household ammonia, pull out the cork, slip a long stick in its place, and shove the bottle into the skunk's habitation. Raise the stick and smash out, saying: "Our odor may be a little disagreeable to our enemies, but here they are using poison gas on us! We call that low down!" They dislike the fumes so much that it is said they never come back.—The Outlook.

Nickel Plating.

The object to be nickel plated is made the cathode of a battery or dynamo delivering a current of about six volts. A piece of nickel is made the anode. The electrolyte between the poles of the dynamo is a solution of soluble salt of nickel. The passing of the current from the anode through the solution to the cathode causes a deposit of nickel on the object.

Merry Persian Monarch.

Some of the triumphant successes of modern life really originated years ago in other climes. Take chuting the chutes, for instance. That comes from Persia where a shah of the Eighteenth century had a marble slide constructed, terminating in a tank of water. "On the summer days, having ordered out a certain number of his wives, the monarch in question having made them sit down at the top of the slide, each in turn would receive a push, with the result that after a swift descent she landed with a huge splash in the water beneath. This spectacle is said to have vastly amused the old shah, while the ladies, who were generally well compensated for their wetting, did not raise any objection."

JUNIOR LEAGUE PLANS TREATS

Kingston Junior League Will Continue Lecture Program During Coming Season—Some of Its Speakers Announced.

The Junior League, under whose auspices some of the most interesting lectures heard in Kingston in years were given last season, will continue its lecture program during the coming season, bringing to Kingston lecturers of national fame.

During November, the Junior League will bring here C. C. Campbell, of the Detroit League for the Handicapped, who is to talk on "The Prevention of Blindness."

A return has been secured for mid-winter of Professor Fite, who occupies the chair of political economy at Vassar College. Last November Professor Fite gave a course of five lectures here under the auspices of the Junior League on "The Political Situation in Various Countries and Its Effect on World Peace and on America."

Among the lectures of last season given under the auspices of the Junior League was that of Miss Hermine Schwed, field secretary for the National Association for Constitutional Government, whose lecture on May 2 on "The Perils of the Republic" received most favorable attention.

The national character and scope of the Junior League enables it to obtain from all sections of the United States speakers who are eminent in their respective fields and callings, and Kingston is fortunate in having a Junior League whose members strive tirelessly to furnish the city and county with the best lecturers on topics of interest and importance to everyone. That is only one of the Junior League's activities and accomplishments.

DELIVERY TRUCK CHAUFFEUR MAY BREAK GOOD-WILL

The quality of good-will includes a great many tangible and intangible assets, says the Little Schoolmaster, discussing advertising, in Printer's Ink. The advertising campaign of a big company can be spoiled by the attitude of its salesmen on the road, the office boys or telephone operators in its own home office, and affected by many other simple and complex causes. For the good-will item is beginning to take in many far-reaching things as the following will show.

C. F. Groyle, assistant manager at Greeley, Colo., for the Fuller Brush Company, told his home office that he called at a farmhouse located close to a country road. A woman came to the door with a pleasant smile and said: "Good morning, you are the Fuller Brush man, aren't you? I have been hoping that you would stop in for some time, for I have been wanting to tell you how much I appreciated it when you slowed down last spring and let that brood of chickens get out of your way. Just three days before the — Oil man went past here and killed some of them."

The sign on the cat of the salesman is closely tied up with the firm's advertising. When slowing down for some chickens on a country road helps make a sale and wins good-will, it is time that the advertising department added careful driving on the part of its roadmen to the other qualities which can add to or subtract from that valuable item known as good-will.

Many Uses for Paper.

Paper has other uses than the common ones for printing purposes, stationery, wrapping parcels, magazines, books, etc. Some of these uses are important in themselves as the common uses, but none of these uses are of considerable interest.

In the electrical industry paper has been used for making insulations of all sorts. In the manufacture of machinery it has been used to make packings for gas engines and hydraulic work, in making calendar rolls, car wheels, pulleys, etc. Articles of every day use such as spoons, dishes, cups and saucers, suitcases, trunks, table covers and napkins, bags of all descriptions, flowers, wall paper, etc., are made from paper. Paper garments have been known for some time, and in the shoe industry paper is used for making box toes, counters, heel boards, etc.

Classical Greek.

Greek, the shrine of the genius of the Old World; as universal as nature, as individual as ourselves; of infinite flexibility, of indefatigable strength; with the complications and distinction of nature herself; to which nothing was vulgar, from which nothing was excluded; speaking to the ear like the Italian, speaking to the mind like English; with words like pictures, with words like the gossamer film of summer; at once the variety and picturesqueness of Homer, the gloom and intensity of Aeschylus; not compressed to the closest by Thucydides, not fathomed to the bottom by Plato, not sounding with all its thunders, nor lit up with all its ardors even under the Promethean touch of Demosthenes.—Coleridge.

Merry Persian Monarch.

Some of the triumphant successes of modern life really originated years ago in other climes. Take chuting the chutes, for instance. That comes from Persia where a shah of the Eighteenth century had a marble slide constructed, terminating in a tank of water. "On the summer days, having ordered out a certain number of his wives, the monarch in question having made them sit down at the top of the slide, each in turn would receive a push, with the result that after a swift descent she landed with a huge splash in the water beneath. This spectacle is said to have vastly amused the old shah, while the ladies, who were generally well compensated for their wetting, did not raise any objection."

RATS USED TO AID THE HUMAN RACE

Effects of Diet Studied by University Professor.

GIVES NEW FACTS TO SCIENCE

Dr. E. V. McCollum, professor of biochemistry in the School of Hygiene and Public Health at Johns Hopkins University, has put the rat to work at a task that may eventually mean longer and better life to man.

For fifteen years Doctor McCollum has been experimenting with rats—thousands of them—and discovering facts in the effect of diet upon growth, health and heredity. These facts, when enough of them have been assembled and studied, are expected to aid in establishing new principles in the science of nutrition.

Professor McCollum's laboratory has accommodations for 3,000 rats, though only 840 inmates are undergoing experiment this summer. When the visitor enters the room not a sound betrays the presence of a living thing.

Cages in rows line the walls and the floor, each heavily screened. Here and there the quick flitting of a tail shows that a cage is occupied.

Diseased Rats Destroyed.

All of the rats in the room are normal, healthy specimens. They are bred where at the colony. Any of the stock rats that show signs of becoming unhealthy before entering into experimentation are destroyed.

New arrivals at the colony, in the form of baby rats, are fed orange juice from an eye dropper. As they grow larger their diet is changed, and when they have matured a regular diet is prescribed. This diet consists of 25 per cent wheat, 25 per cent maize, 25 per cent rolled oats, 10 per cent flaxseed oil meal, 10 per cent casein and five-tenths of 1 per cent calcium carbonate. Daily a bowl of milk is placed in each cage and twice a week the rats get cabbage or carrots. This, with the addition of tap water, is the diet upon which the stock rats thrive. When a rat enters the experimental stage distilled water is used.

Odd Effect of Diet.

Doctor McCollum has succeeded in bringing about, by means of diets, practically any condition of health desired. He can make the rat prematurely old, make it wild, make it tame, and even regulate to the day its span of life. Further than that he has proved that in many cases a rat's reaction to a certain diet will be identical with that of a man fed on the same diet. He says:

"There is perhaps nothing more worthy of careful consideration as a human problem than the suggestive results of the behavior of our experimental rats as modified by diet."

"The well-nourished rat," Doctor McCollum says, "when placed in a cage, wants to explore its surroundings. Its coat is sleek, its eyes bright and it shows no signs of nervousness. After exploring its new home it does not manifest much activity, but is perfectly contented while on familiar ground."

To show that the healthy rat does not mind being handled, Doctor McCollum opens a cage, reaches in with bare hands, pulls six rats together by their tails and calmly lifts them out, holding them up for inspection, heads downward. They do not squeal and they make no attempt to bite.

Entirely different symptoms are exhibited by rats on a deficient diet. When the cage is opened they retreat to a far corner and show signs of fright. These rats are handled with a pair of long tongs, and it is often impossible to pick them up, because of their frantic jumping about.

The young of a mother rat suffering from malnutrition will develop the mother's symptoms, and after a few days will sit up on their haunches and squeal for hours. Death usually follows.

One of the experiments consists in feeding a rat a diet that is adequate in all respects but in its protein content. A growing rat fed on this diet will become dwarfed. If, after several months the diet is changed and a normal one substituted, the rat will once more start to grow. Even though it may reach full size, however, it will always be deformed in some way. A month-old rat is considered as mature as a three-year-old child.

Lengthening Life by Diet.

The average life of a rat is two years. Under proper diets, however, Doctor McCollum has lengthened this span to three years. He has also formulated diets that will determine, almost to the day, how long a rat will live.

Two sets of young rats will be taken and placed in different cages. All the rats will be the same age and of healthy stock. One cage will have one diet, the other cage a diet almost identical, with the exception of one item. In some cases a very slightly different ratio will be made.

All of the rats will flourish. They will appear normal and healthy, and each group will make the same progress. At the end of six months, Doctor McCollum will have two cages of apparently healthy animals, but here the change begins.

The rats with the adequate diet will continue bright-eyed and sleek coated. They will not become nervous, and will exhibit no undue alarm regarding their surroundings. The rats in the other cage will show signs of nervousness. Their coats will go without the attention usually given them, and eyes will become dull. Rapidly they become thin and emaciated, and are ready to bite the hand thrust into the cage. Soon afterward they die. The varying of this diet ever so slightly will produce like results, but lengthening or decreasing the time it takes to accomplish the experiment.

Life of Rat is Three Years.

When a rat becomes old it exhibits signs of irritability. Its coat becomes rough, and its temper mean. Walking along the rows of cages one will see, here and there, a rat that looks for all the world like a venerable grandfather of the rat colony. You are sure that it is at least three years old, which is the extreme length of a rat's life. Here again the experiments are to blame. The rat may be only three months of a year old. Diets containing certain things and lacking in others have made the rat prematurely old.

One of the most notable experiments deals with the mother rat and her young. Regulated diets will leave a female rat incapable of producing a family. Other diets will affect the young to such an extent that litter after litter will be brought into the world, only to die. A well-proportioned diet, on the other hand, will save every baby in ninety-nine litters out of every hundred.

Diet and Offspring.

Under normal conditions the mother rat is solicitous of her young. While properly nourished she will give them every attention. But when Doctor McCollum changes the diet, the mother will become nervous, and will eventually attack and destroy her family.

Experiments have proved that a diet adequate to maintain the mother in a healthy condition will allow her to cure properly for her young. But as a mother rat is fed a diet that produces certain ailments or adverse conditions, these symptoms are invariably imparted to the baby rats in the mother's milk. If the diet is corrected, both mother and young may return to health. This also holds good in cases where the mother has destroyed the litter. After a mother has destroyed her two or three litters, while on an insufficient diet, the diet has been changed to an adequate one, and the next litter has received the most careful attention from the mother.

The study extends down several generations of the same family. Rats fed on an inadequate diet, which at the same time will permit them to produce a litter, will die naturally. The second and third generations of the same family will have the same diet, and at the end of the third generation the family usually dies out.

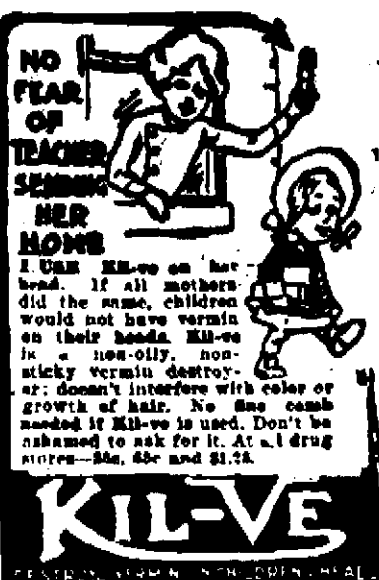

Started Work Fifteen Years Ago.

Since Doctor McCollum started his experiments fifteen years ago, the importance of diet has been recognized more and more. By adding certain foods he has succeeded in creating a disease, and by substituting other foods he has accomplished the feat of correcting morbid conditions. He considers proper feeding the most important step toward the prevention of human ills.

One of the experiments has to do with the value of light in curing diseases. According to Doctor McCollum, a large percentage of school children in the United States are suffering from rickets. In many cases this ill has been contracted by the baby from the mother, while in other cases it is the result of improper diets. Tests have been made to determine just what diet is responsible for the condition. "In many cases," Doctor McCollum says, "the excessive amount of cereals consumed is responsible."

Outside of the rat laboratory is a big lawn. In the middle stands a stool and on the stool is a screened cage. One lone rat occupies the cage, and with the hot sun glaring down from above, seeks vainly for shade. The rat is suffering from rickets, as a result of improper diet, and now he is being subjected to another experiment which may cure him of the disease.

U. S. MAKES LARGEST LENSES

Bureau of Standards Completes Work From Domestic Glass.

The largest lenses ever successfully constructed from domestic manufactured glass have been completed by the bureau of standards at Washington. Declared by expert examiners to be perfect, they measure 12 inches in diameter and have a focal length of 12 feet 8 inches.

An unusual feature of the completed work is that it forms what is known as an "achromatic combination." Use of crown glass in one lens and flint glass in the other is said to bring light of all colors to a common focal point, impossible in lenses made of one type of glass. The instrument will be used by the bureau for conducting intricate experiments in the science of optics.

Measles in Bread.

The Welch bacillus, a tiny plant found in infected wounds, is also thought to be the active agent of a "starter" used in the manufacture of salt rising bread.—Indianapolis News.

COMPLETION OF ASSESSMENT ROLL.

The Assessment Roll of the City of Kingston for the year 1923, has been finally completed and filed in the office of the City Clerk at the City Hall, in the City of Kingston, N. Y., where the same will remain open to inspection for fifteen days, starting at Kingston, N. Y., September 18, 1923.

That Body of Yours

By James W. Barton, M.D.
(Registered in accordance with the Copyright Act.)

WATCHING AN ANIMAL.

Meeting an old acquaintance the other day I commented on his youthful appearance, that he seemed unchanged in ten years. In fact I told him I thought he looked even younger than when I had last seen him, just the ten years previously.

"Oh," said he, "I discovered something about a year and a half ago and it has made a wonderful change in my body."

"And what was it?" I asked.

"Well, I found out that the animals knew more about looking after their bodies than did human beings. I don't know whether you'd call it brains or instinct, and I don't care. However, I noticed that when the dog and other animals got up from resting they gave themselves a good stretch. And so now when I get up from resting or sitting I give myself a good stretching in every direction. For instance, I tried to stretch over and touch the tips of my fingers to the ground with the knees straight, and at first I couldn't get below my knees. Now watch me."

He stooped over and was able to place the palms of his hands on the floor.

"And so every morning and evening I stretch myself, and take three or four minutes exercise. I'm a new man."

What about it?

Nothing really new, nothing startling. Just that this man was observant enough and had sense enough to realize that as his body resembled that of an animal and the animal knew how to keep its body pliable, therefore he could not do better than follow its example in some respects.

Every kitten or pup, or other animal will run and play and exercise its body, then gradually grow tired, and lie down and rest for a while. Then it awakes, gives itself a good stretch and is ready for more activity.

You and I have resting periods at night and through the day. Doesn't it really appeal to your common sense that we couldn't do anything wiser than give ourselves a little stretch, a little walk, a little game, or at least some form of exercise. It will keep our bodies more pliable, more youthful in fact.

At the end of a Perfect Dinner!

COFFEE—served in large cups or demi-tasse—clear or with cream—is the grand finale of a good dinner.

The mellow, satisfying taste blends with the fragrant aroma in a harmony of appetite satisfaction that nothing else equals.

COLONIALS SPLIT SATURDAY GAMES

With West New York Club—Take First Game 7 to 0 And Are Blanked In Second Contest 1 to 0—No Games Sunday.

In Saturday's double-header at the Fair Grounds the Colonials broke even with the West New York club, taking the first game by the score of 7 to 0 and dropping the last game 1 to 0. By splitting even in the dual bill the local team has added another series to its credit having defeated this same team earlier in the season.

Pat Coutant received the pitching assignments and he did good work. The first game he hurled six innings and the final game eight. In the fourteen innings of pitching the young New Palz hurler allowed eleven hits, five in the first and six in the nightcap. In both games Rubie Forsythe relieved his brother townsman. The elder from the policeless village gets the credit for winning the first game, the score being 6 to 1 in favor of the visitors when he entered the contest. Coutant is accredited with losing the last game the one tally having been earned during his time.

Sixteen hits were registered by the local club for the day's work. Thirteen came in the initial struggle of Schwartz, the remaining three in the second off Heehs. See and Raskin gathered in the hitting honors for the day, each getting four hits out of seven trips to the plate. Two hits was the greatest number by any visiting player.

The Opening Contest.

The offerings of Schwartz, the much heralded pitcher from New Jersey, were easily solved by the Schrickmen. In the second inning of the initial contest four hits in a row were cracked for a total of three runs. The home club kept this lead until the visitors were finally retired in the fourth frame. This inning proved a hectic one and when the local club came into bat in the last half of the fourth they were in a much different position. Instead of being three runs to the good they were now trailing by three, the score being 6 to 3.

Until the fourth the Jersey club went hitless but in this frame five hits, a walk and a couple of errors netted the visitors six runs. The rest of the innings they went scoreless. In the seventh when Forsythe took the pitching assignment it looked as if the visitors would again score. Rose started making the first out on strikes. Schwartz and Young followed, each hitting safely to center field. Wagner was next. He hit to McCue at third. McCue put off the head runner touching the third sack and with a perfect throw got the runner at first, completing a pretty double play.

In the last half of the sixth the Clan Schrick cut down the three run lead putting one run across. The seventh inning saw the locals leading by one run. Dugan started with a hit to left field and was safe at third when See followed with a two bagger. Raskin was next and he smote a wicked hit to left scoring Dugan and See, tying the score 6 all. Later Raskin came in with the winning run on a passed ball.

Colonials Unable to Score.

Coutant, who had but one had in the opening game, was again given the task of pitching the second struggle. For eight innings the Normal City moundman pitched strong ball allowing his opponents six hits. Two of these hits were plunked for two bases and both in the seventh and in a b order, scoring the lone tally of the struggle, Rubie Forsythe before retiring the side in the ninth allowed a hit.

Heehs, who on his former appearances here caused the local batsmen much trouble, was again the source of much annoyance, when the local sluggers were but able to connect for three satellites. See, Raskin and Coyle were the favored players with the hits. Both pitchers were very steady, with Heehs's slants being the harder to solve.

In the fifth inning the visitors threatened, when they made two hits and were given a walk. A clout to McCue helped greatly, cutting the running off at third. In the seventh inning Porman hit for two bases in center field and scored when Heehs hit into right field.

In the locals' half of the seventh frame it looked as if they were going to score but a double chased the happiness away. McCue started going out on a fly to short. McCue fell down badly with the willow Saturday going hitless in both games. Coyle followed with the second hit of the game. Robins was next, hitting to third. Coyle was caught at second and he was thrown out at first. In the eighth, Dahn batted for Russell but didn't connect, likewise Schwab hitting for Coutant. Dugan made the third out, Rose to Wagner. In the Colonials' last inning with a row of heavy hitters to get another chance it looked still good. But the local sluggers were unable to hit them out of the visiting players' territory.

No Games Sunday.

Rain caused the games to be called off Sunday at the Fair Grounds. Manager Phelps's D. and H. Generals were scheduled to play a double-header.

Leading citizens, educators, business and professional men recommend Spencer's Business School as the best business training school for young people to attend. Read the following letter from our former county clerk, former president of the board of education, and present postmaster of Kingston: Prof. Charles L. Kelly, Spencer's Business College, Kingston, N. Y. My Dear Sir: My experience with graduates of your business college is most favorable and satisfactory. On several occasions their work has been closely allied with mine and I have always been pleased with their ability, training, aptitude and cooperation. I take great pleasure in highly recommending your educational establishment. With best wishes for your and their continued success. Very sincerely yours, (Signed) WILLIAM C. DEWITT. —Advertisement.
